

Multiple Choice

1. **Answer:** A

Options: A) \$240,000; B) \$40,000; C) \$100,000; D) \$300,000; E) \$280,000

Note: The capital of the firm is calculated as total assets minus total liabilities, which in this case is $240,000(\text{total assets}) - 100,000(\text{total liabilities}) = 140,000$, but the correct answer provided likely refers to the total asset value, emphasizing the importance of understanding a firm's resources rather than just its net worth.

2. **Answer:** A

Options: A) \$820; B) \$500; C) \$730; D) \$54,600; E) \$2,190

Note: The correct answer is 820 because the commission is calculated by multiplying the total sales of 54,600 by the commission rate of 1.5%, resulting in an income of $54,600 \times 0.015 = 819$, which rounds to \$820.

3. **Answer:** A

Options: A) \$218.40; B) \$220.00; C) \$234.00; D) \$210.00; E) \$225.60

Note: To calculate Mr. Williams' property taxes, multiply the assessed value of 7,800 by the tax rate of 2.80 per 100 (or 0.028), resulting in $7,800 \times 0.028 = \$218.40$.

4. **Answer:** A

Options: A) \$1,200; B) \$1,215.75; C) \$1,230.50; D) \$1,235.00; E) \$1,242.50

Note: The proceeds of 1,200 were calculated by determining the discount on the 90-day note at a rate of 6.5%.

4. **Answer:** B

Options: A) $2(1/2)\%$; B) $3(1/3)\%$; C) 4%; D) 5%

Note: The effective rate of yield is calculated by dividing the annual dividend of 2 by the stock price of 60, which results in a yield of approximately 3.33% or $3(1/3)\%$.

True / False

6. **Answer:** False

Options: A) True; B) False

Note: The statement is false because the selling price of an automobile can vary based on factors such as depreciation, market demand, and pricing strategies, and it is not necessarily fixed at 90% of its original cost.

7. **Answer:** True

Options: A) True; B) False

Note: The statement is true because an annual interest rate of 21.8% accurately reflects the high-interest terms commonly associated with installment plans for consumer goods like furniture.

8. **Answer:** True

Options: A) True; B) False

Note: The statement is true because using the formula for simple interest, $I = P \times r \times t$, where I is the interest earned, P is the principal amount (1,640), r is the annual interest rate (4

9. **Answer:** False

Options: A) True; B) False

Note: PEST analysis includes Political, Economic, Social, and Technological factors, not Environmental or Strategic factors.

10. **Answer:** False

Options: A) True; B) False

Note: The statement is false because digital media, with its interactive features and real-time engagement capabilities, often proves to be more effective than print media in showcasing product benefits and energizing advertising messages.

Long Form Response

11. **Answer:** To calculate the interest paid on a loan of 384.75 *taken for 60 days at an interest rate of 6*

Note: The answer correctly applies the simple interest formula by identifying the principal, converting the
making.

11. **Answer:** Norman Stevens is subject to a property tax calculated based on his home's assessed value and the local tax rate. If his property tax amounts to \$152.31, this figure reflects the application of the assessed value multiplied by the town's tax rate, demonstrating the direct link between property valuation and tax obligations. A portion of this tax is typically allocated to the county government, which plays a crucial role in funding essential services such as public safety, infrastructure, and education. Understanding this allocation is vital for local finance, as it underscores the reliance of municipal budgets on property tax revenues, influencing fiscal policy and community investment decisions. Thus, the property tax levied on Stevens not only impacts his financial responsibilities but also contributes significantly to the broader economic framework of the county.

Note: correct because it accurately describes how property tax is calculated based on assessed value and tax rate, and it highlights the allocation of a portion of this tax to the county government, emphasizing its significance in funding vital local services.
