True / False (10 marks)

Answer True or False

6. True or False: If American agriculture is the most efficient, the United States would have no need to import any food at all.
7. True or False: The Aggregate Supply (AS) curve in the long run is always upward sloping due to sustained increases in demand.
8. True or False: A depreciation of the dollar typically reduces the cost of imports, making them more attractive to domestic consumers.
9. True or False: An increase in disposable income by X results in saving increasing by exactly X without affecting consumption.
10. True or False: The correct answer to 'Consider the following equation and determine the class of model that it best represents $y_{it} = \alpha + \beta_{it} + \mu_i + \nu_{it}$ ' is 'A pure time series model'.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the implications of rejecting the null hypothesis in classical hypothesis testing. Why is it incorrect to assume that the alternative hypothesis is automatically accepted?
12. Discuss the factors that make relatively free entry and exit realistic in a monopolistically competitive industry, focusing on the role of long-term contractual obligations for suppliers.
