3. A likely cause of falling Treasury bond prices might be
 - (a) an increase in private sector investment.
 - (b) expansionary monetary policy.
 - (c) a strengthening dollar.
 - (d) fiscal policy designed to reduce the budget deficit.
 - (e) contractionary monetary policy.
4. What are the dimensions of $\hat{u}^t \hat{u}$?
 5. $k \times T$
 6. $T \times k$
 7. $T \times k \times 1$
 8. $T \times T$
 9. 1×1

A monopsonist is identified by one of the following:

- (a) A wage payment lower than the average revenue product of labor.
- (b) Employment level lower than that of a competitive labor market.
- (c) A single buyer of labor services.
- (d) Employment level greater than that of a competitive labor market.
- (e) A wage payment lower than the marginal revenue product of labor.

True / False (10 marks)

Answer True or False

6. True or False: A decrease in the price of orange juice will result in a rightward shift of the demand curve for orange juice.
7. True or False: The measure of a firm's market power is given by $(MC-P)/P$, which indicates greater power with a larger value.
8. True or False: Increased demand and decreased supply of dollars will lead to a depreciation of the dollar's value.
9. True or False: A decrease in the number of firms in a market will cause the market demand curve for labor to shift to the right.
10. True or False: In the long run, firms in monopolistic competition earn zero economic profits due to free entry and exit in the market.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the role of the turnover tax in the Soviet economy, analyzing its effects on consumer demand and overall economic activity.
12. Discuss the conditions under which a perfectly competitive firm decides to shut down operations, focusing on the relationship between price and average total cost.
