

## Multiple Choice

1. **Answer:** A

*Options:* A) Religious differences; B) A national holiday; C) An attack by another country; D) A charismatic national leader

*Note:* Religious differences can create divisions within a country that lead to social fragmentation and conflict, thus acting as a centrifugal force that pulls groups apart rather than unifying them.

2. **Answer:** C

*Options:* A) Malls; B) Fences; C) Zoning; D) Tunnels

*Note:* Zoning is the key concept that city planners use to designate specific areas for different types of land use, thereby effectively separating incompatible uses like housing and sewage plants to minimize conflicts and enhance livability.

3. **Answer:** C

*Options:* A) Dove soap; B) Dove candy bar; C) Dove symbol; D) A dove (bird)

*Note:* The dove symbol represents ideas and values, such as peace and hope, which are components of nonmaterial culture, as opposed to tangible objects that make up material culture.

4. **Answer:** C

*Options:* A) Sunni and Shinto; B) Shinto and Shiite; C) Sunni and Shiite; D) Shamanism and Shiite

*Note:* The correct answer is Sunni and Shiite because these two branches represent the largest divisions within Islam, each with distinct beliefs and practices that have shaped the religion's history and cultural diversity.

5. **Answer:** C

*Options:* A) will hinder global trade.; B) make plants more resistant to disease.; C) may cause irreversible changes in humans.; D) make plants more resistant to drought.

*Note:* Opponents of GMOs are concerned that genetic modifications in food could lead to unforeseen and potentially harmful alterations in human health and biology that may be difficult or impossible to reverse.

## True / False

6. **Answer:** False

*Options:* A) True; B) False

*Note:* The United States is a federal system, meaning it has multiple levels of government, including state and local governments, that share power with a central government rather than being controlled entirely by it.

7. **Answer:** False

*Options:* A) True; B) False

*Note:* The statement is false because an absolute location requires specific coordinates, such as latitude and longitude, rather than just the name of a city.

8. **Answer:** True

*Options:* A) True; B) False

*Note:* Cultural pluralism is characterized by the presence of diverse cultural groups within a society that maintain their unique traditions and identities, rather than assimilating into a single dominant culture.

9. **Answer:** False

*Options:* A) True; B) False

*Note:* The European Union has not established a common European language; instead, it recognizes multiple official languages to accommodate the diverse linguistic backgrounds of its member countries.

10. **Answer:** False

*Options:* A) True; B) False

*Note:* Cities in the developing world often struggle with inadequate infrastructure and economic challenges, leading to less developed or informal centers of commerce compared to those in developed countries.

## Long Form Response

11. **Answer:** Relict boundaries are physical or cultural lines that were once significant but have lost their importance over time, often due to changes in political or social landscapes. A common example of a relict boundary is the division between East and West Germany, which is now purely historical. Bolivia is often not associated with a well-known example of a relict boundary because its borders have remained largely stable and recognized since the country's independence, without significant internal divisions that have faded away. This stability contrasts with other regions where historical conflicts or changes have left remnants of boundaries that are no longer relevant. As a result, Bolivia's geographic and political history does not prominently feature a relict boundary, making it less recognized in discussions about this concept. *Note:* correct because it accurately defines relict boundaries as historical lines that have lost their significance and explains Bolivia's lack of association with a well-known example due to its stable and recognized borders since independence.

12. **Answer:** The transition from subsistence agriculture to large-scale commercial development in the Amazon Basin has significantly impacted both the environment and local communities. Subsistence agriculture, practiced by indigenous people, focuses on growing food for personal use, promoting biodiversity and sustainable land practices. However, the shift to commercial development, driven by logging, agriculture, and mining, leads to deforestation, loss of wildlife habitats, and increased greenhouse gas

emissions. This transformation also disrupts local communities by displacing people from their land and diminishing their traditional ways of life. As the Amazon Basin faces these changes, it highlights the tension between economic growth and environmental preservation.

*Note:* The answer correctly highlights the contrast between sustainable subsistence agriculture and the environmentally destructive practices associated with large-scale commercial development, emphasizing the consequent ecological damage and socio-economic changes experienced by local communities in the Amazon Basin.
