

Multiple Choice (10 marks)

1. What is the percentage of children aged 13-15 in Egypt who reported being bullied at least once in the past couple of months as of 2015?
 - (a) 10%
 - (b) 30%
 - (c) 50%
 - (d) 70%
2. Which of the following countries emitted the most CO₂ in 2017?
 - (a) Canada
 - (b) Russia
 - (c) Iran
 - (d) Japan
3. What is the percentage of children aged 13-15 in China who reported being in a physical fight at school, one or more times during the past 12 months as of 2015?
 - (a) 9%
 - (b) 19%
 - (c) 39%
 - (d) 59%
4. Overall, the growth rate of average incomes in less developed countries between 1960 and 1995
 - (a) was approximately zero
 - (b) exceeded that of high income countries
 - (c) exceeded that of Britain during the industrial revolution
 - (d) was approximately 3.0% per year
5. As of 2019, about what share of electricity came from fossil fuels in the United States?
 - (a) 23%
 - (b) 43%
 - (c) 63%
 - (d) 83%

True / False (10 marks)

Answer True or False

6. True or False: In spite of these disasters, in the Tongzhi Restoration of the 1860 s, Han Chinese elites rallied to the defense of the Confucian order and the Qing rulers. The initial gains in the Self-Strengthening Movement were destroyed in the First Sino-Japanese War of 1895, in which the Qing lost its influence over Korea and the possession of Taiwan.
7. True or False: The London Natural History Society suggest that London is "one of the World's Greenest Cities" with more than 40 percent green space or open water. They indicate that 2040 species of flowering plant have been found growing there and that the tidal Thames supports 120 species of fish.
8. True or False: The network began running into some trouble in the ratings by 2010. That year, the sixth and final season of *Lost* became the drama's lowest-rated season since its debut in 2004. Ratings for the once-instant hit *Ugly Betty* collapsed dramatically after it was moved to a different answer at the start of its fourth season in the fall of 2009; an attempt to boost ratings by moving the dramedy to Wednesdays failed, with its ultimate cancellation by the network eliciting negative reaction from the public, and particularly the show's fanbase.
9. True or False: As of 2010, 46.29% (584,463) of Bronx residents aged five and older spoke Spanish at home, while 44.02% (555,767) spoke English, 2.48% (31,361) African languages, 0.91% (11,455) French, 0.90% (11,355) Italian, 0.87% (10,946) various Indic languages, 0.70% (8,836) other Indo-European languages, and Chinese was spoken at home by a different answer (6,610) of the population over the age of five.
10. True or False: Embryophytes are multicellular eukaryotes descended from an ancestor that obtained its energy from sunlight by photosynthesis. They have life cycles with alternating a different answer phases.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Read the following passage and answer the question: Realizing that war was imminent, Prussia preemptively struck Saxony and quickly overran it. The result caused uproar across Europe. Because of Prussia's alliance with Britain, Austria formed an alliance with France, seeing an opportunity to recapture Silesia, which had been lost in a previous war. Reluctantly, by following the imperial diet, most of the states of the empire joined Austria's cause. The Anglo-Prussian alliance was joined by smaller German states (especially Hanover). Sweden, fearing Prussia's expansionist tendencies, went to war in 1757 to protect its Baltic dominions, seeing its chance when virtually all of Europe opposed Prussia. Spain, bound by the Pacte de Famille, intervened on behalf

of France and together they launched an utterly unsuccessful invasion of Portugal in 1... Question: What was the initial country to ally with France?

12. Read the following passage and answer the question: DST's potential to save energy comes primarily from its effects on residential lighting, which consumes about 3.5% of electricity in the United States and Canada. Delaying the nominal time of sunset and sunrise reduces the use of artificial light in the evening and increases it in the morning. As Franklin's 1784 satire pointed out, lighting costs are reduced if the evening reduction outweighs the morning increase, as in high-latitude summer when most people wake up well after sunrise. An early goal of DST was to reduce evening usage of incandescent lighting, which used to be a primary use of electricity. Although energy conservation remains an important goal, energy usage patterns have greatly changed since then, and recent research is limited and reports contradictory results. Electricity... Question: When DST was first proposed, what type of lighting was consuming the most electricity?
