

Multiple Choice (10 marks)

1. The study of older adults and aging is referred to as
 - (a) Gerodiversity
 - (b) Geropsychiatry
 - (c) Geronutrition
 - (d) Gerolinguistics
 - (e) Gerocommunication
2. The three countries with the most drug injectors are:
 - (a) India, Brazil, and South Africa
 - (b) Canada, Mexico, and Japan
 - (c) Australia, New Zealand, and Indonesia
 - (d) China, the U.S. and Russia
 - (e) Afghanistan, Iraq and Myanmar
3. Zinc finger proteins and helix-turn-helix proteins are
 - (a) involved in the synthesis of ATP
 - (b) types of RNA-binding proteins
 - (c) part of the hemoglobin in blood cells
 - (d) involved in the control of translation
 - (e) components of the cell's cytoskeleton
4. Which of the following is the main nitrogenous compound in urine?
 - (a) Uric acid
 - (b) Nitrous Oxide
 - (c) Nitric Acid
 - (d) Nitrites
 - (e) Nitrogen
5. In DNA adenine normally pairs with:
 - (a) protein.
 - (b) cytosine.
 - (c) thymine.
 - (d) guanine.
 - (e) nucleotide.

True / False (10 marks)

Answer True or False

6. True or False: Public health ethics is fundamentally population-centered, focusing on the health of communities rather than just individuals.
7. True or False: A mutation in the SNRPN gene is the primary cause of Angelman syndrome.
8. True or False: An ileostomy opening is ideally less than 1 cm in length to ensure minimal visibility and discomfort.
