True / False (10 marks)

Answer True or False

6. True or False: Social support positively influences health and well-being when it is perceived as supportive by the recipient.
7. True or False: Older adults may have difficulty retrieving memories due to the increased number of memories that must be sifted through during recall.
8. True or False: Alzheimer's disease has significantly increased as a cause of death over the last two decades.
9. True or False: Factor VIII is only distributed to hospitals with strict infection control protocols to prevent HIV transmission.
10. True or False: Leucine is an amino acid that cannot serve as a substrate for gluconeogenesis in the human body.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the implications of recurrent laryngeal nerve damage on vocal fold positioning during laryngoscopic examination, focusing on the roles of the cricothyroid and interarytenoid muscles.
12. Discuss the impact of environmental factors, particularly exposure to radiation, on bone density loss. Analyze the mechanisms involved and the implications for public health.
