

Multiple Choice (10 marks)

1. The best evidence exists for which nutrients in the prevention of age related cognitive decline?
 - (a) N-3 fatty acids
 - (b) Phytochemical
 - (c) N-6 fatty acids
 - (d) Long chain saturated fats
2. Which of these factors reduces the risk for cancer of the colorectum?
 - (a) Vitamin C
 - (b) Dietary fibre
 - (c) Alcohol
 - (d) Oestrogen
3. What should elite athletes ideally consume during prolonged high intensity exercise (>2.5 hours)?
 - (a) 60 g glucose per hour
 - (b) 60 g glucose plus fructose per hour
 - (c) 90 g glucose per hour
 - (d) 90 g glucose plus fructose per hour
4. Which are the FIVE main series of apoproteins that have been identified?
 - (a) apoA, apoB, apoC, apoD, and apoE
 - (b) apoA, apo(a), apoB, apoC and apoE
 - (c) apoA, apoB, apoC, apo E, and apoL
 - (d) apoB, apoC, apoD, apoE and apoM
5. What endogenous substrate source provides the most energy during moderate to high intensity exercise?
 - (a) Liver glycogen
 - (b) Muscle glycogen
 - (c) Intramuscular lipid
 - (d) Adipose tissue lipid

True / False (10 marks)

Answer True or False

6. True or False: Older adults are less likely to experience vitamin B₁₂ deficiency due to improved dietary habits and absorption.
7. True or False: Vitamin A is essential for vision in dim light, helping the eyes to adjust to low-light conditions.
8. True or False: Eosinophilic oesophagitis may cause oesophageal obstruction due to inflammation and swelling of the esophagus.
9. True or False: High nutrient requirements for tissue turnover do not contribute to vitamin or mineral deficiencies in older people.
10. True or False: Vitamin A plays a role in the activation of vitamin D receptors in the body.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the potential nutritional deficiencies in a vegan diet, focusing on the role of Vitamin B₁₂ and its importance for overall health.
12. Discuss the importance of maintaining specific blood pressure and lipid levels in adults with diabetes for cardiovascular disease prevention, and analyze how these goals can impact overall health.
