

Multiple Choice

1. **Answer:** B

Options: A) Inca; AD 200; B) Moche; AD 400; C) Olmec; AD 100; D) Maya; AD 400; E) Zapotec; AD 500

Note: The Moche civilization is recognized as one of the earliest and most influential cultures in ancient South America, flourishing in northern Peru and reaching its peak around AD 400 through advanced agricultural practices, complex social structures, and impressive architectural achievements.

2. **Answer:** A

Options: A) the need to form alliances with neighboring civilizations for trade and protection; B) the need to develop a calendar system for agricultural planning; C) the need to develop a complex social system that would allow the construction of canals; D) the use of irrigation to produce enough food; E) the creation of a military force for defense and conquest

Note: The need to form alliances with neighboring civilizations for trade and protection was not a primary factor in the development of Mesopotamian civilization, as its growth was largely driven by advancements in agriculture, urbanization, and technological innovation rather than reliance on external partnerships.

3. **Answer:** C

Options: A) 40 residential complexes; 40,000; B) 50 religious monuments; 5,000; C) 120 earthen mounds; 10,000; D) 70 public squares; 7,000; E) 80 ceremonial mounds; 50,000

Note: The ancient city of Cahokia, a significant pre-Columbian settlement, is historically recognized for its construction of over 120 earthen mounds and a population that peaked around 10,000, reflecting its importance as a center of trade and culture in North America.

4. **Answer:** B

Options: A) the presence of a nearby museum or storage facility.; B) naturally exposed layers in which to search for artifacts, ecofacts, or bone.; C) the accessibility of the site by public transportation.; D) the presence of primary and secondary refuse.; E) the existence of a cache or collection of artifacts.

Note: The appropriateness and usefulness of pedestrian survey relies on the presence of naturally exposed layers that facilitate the visibility and accessibility of artifacts, ecofacts, or bone, which are essential for effective archaeological investigation.

5. **Answer:** E

Options: A) Fire can be used in warfare and to clear fields.; B) Fire was used to create the first forms of currency.; C) Fire allowed early humans to fly kites at night.; D) Fire was used to create intricate cave paintings.; E) Fire makes meat more digestible and

kills bacteria.

Note: The correct answer highlights that the use of fire in cooking not only enhances the digestibility of meat, making it easier for early humans to obtain essential nutrients, but also significantly reduces the risk of foodborne illnesses by killing harmful bacteria, both of which contributed to improved health and survival rates in human evolution.

True / False

6. **Answer:** False

Options: A) True; B) False

Note: The correct answer is: Francis Hutcheson

7. **Answer:** False

Options: A) True; B) False

Note: The correct answer is: the Nine Chapters on the Mathematical Art

8. **Answer:** True

Options: A) True; B) False

Note: According to the passage: University of Deseret

9. **Answer:** False

Options: A) True; B) False

Note: The correct answer is: 1928

10. **Answer:** True

Options: A) True; B) False

Note: According to the passage: regional Italian

Long Form Response

11. **Answer:** middle of 1944

Note: Expected answer: middle of 1944

12. **Answer:** Latins

Note: Expected answer: Latins
