

Multiple Choice

1. **Answer:** C

Options: A) was a simple form of writing with one symbol representing one word; B) all of the above; C) appears to have developed suddenly; D) did not use pictographs; E) was borrowed from the Sumerians

Note: The Egyptian system of hieroglyphics appears to have developed suddenly because archaeological evidence indicates that the earliest forms of writing in Egypt emerged in a relatively short time frame, suggesting a rapid advancement in symbolic communication.

2. **Answer:** A

Options: A) external; extrafamilial; B) interfamilial; extrafamilial; C) religious; military; D) internal; intrafamilial; E) external; internal

Note: Conflict models focus on the role of external tensions, such as competition and war with other societies, in shaping state societies, whereas integration models prioritize the significance of extrafamilial tensions, such as social cohesion and cooperation beyond immediate family units, in fostering societal development.

3. **Answer:** A

Options: A) crop irrigation systems; B) the creation of fishing nets; C) European use of bow and arrow; D) domestication of animals; E) canoes

Note: Crop irrigation systems are not considered a Mesolithic innovation because they emerged later, during the Neolithic period, when more advanced agricultural practices and permanent settlements developed.

4. **Answer:** A

Options: A) When sled dogs were first domesticated; B) When eastern Siberia was first inhabited; C) When the Bering Strait was exposed and open for travel; D) The timeline of the Ice Age

Note: Anthropologists do not need to know when sled dogs were first domesticated because this information is unrelated to the timing of human migration from Siberia to the Americas, which is determined through archaeological, genetic, and environmental evidence.

5. **Answer:** A

Options: A) microcephaly; B) larger brain size; C) ability to swim; D) ability to communicate; E) stronger muscles

Note: The correct answer, microcephaly, suggests that *Homo erectus* may have had adaptations that allowed for more efficient brain function and body regulation, contributing to their capability for long-distance migration compared to *Homo habilis*.

True / False

6. **Answer:** True
Options: A) True; B) False
Note: According to the passage: 100,000
7. **Answer:** True
Options: A) True; B) False
Note: According to the passage: salat
8. **Answer:** False
Options: A) True; B) False
Note: The correct answer is: religious and political
9. **Answer:** False
Options: A) True; B) False
Note: The correct answer is: the 19 th century
10. **Answer:** False
Options: A) True; B) False
Note: The correct answer is: Derby

Long Form Response

11. **Answer:** Cassander
Note: Expected answer: Cassander
12. **Answer:** 535,000
Note: Expected answer: 535,000
