

Multiple Choice

1. **Answer:** D

Options: A) meat to fruits and vegetables.; B) species focused on grasses to fruits and vegetables.; C) nuts and fruits to fish.; D) nuts and fruits to species more focused on grasses.; E) species focused on grasses to meat.

Note: The correct answer reflects the understanding that the shift from C₃ to C₄ photosynthetic pathways in plants, which are associated with warmer, drier climates, led to a decrease in forested areas and an increase in grasslands, thereby altering ancient hominid diets from reliance on nuts and fruits to an emphasis on grasses as a food source.

2. **Answer:** C

Options: A) instructions for the builders written there by the engineers.; B) random scratches and not a meaningful script or written language.; C) intended to identify the local group that had produced them.; D) simple arithmetic performed by carpenters on the building site.

Note: The markings on the mud-bricks of Huaca del Sol likely served as a means of identification to signify the specific local group responsible for their production, reflecting the social and cultural practices of the time.

3. **Answer:** C

Options: A) in sub-Saharan Africa, about 10,500 years ago; B) in western Europe, about 3,500 years ago; C) in the Middle East, about 10,500 years ago; D) in North America, about 5,500 years ago; E) in East Asia, about 5,500 years ago

Note: The correct answer is supported by archaeological findings that trace the origins of cattle domestication to the Fertile Crescent in the Middle East, specifically around 10,500 years ago, marking a significant development in human agriculture and society.

4. **Answer:** D

Options: A) trade.; B) warfare.; C) the development of a common religion.; D) conspicuous consumption by elites.

Note: The Minoan culture is characterized by a relatively egalitarian society with limited evidence of wealth disparity or luxurious displays of material goods typically associated with elite classes in other early civilizations, indicating a lack of conspicuous consumption.

5. **Answer:** E

Options: A) Erectus was not bipedal.; B) Erectus was not capable of using tools.; C) Erectus was primarily herbivorous.; D) Erectus fossils are found only in Africa.; E) Erectus possessed a larger brain.

Note: The correct answer is based on the fact that Homo erectus had a significantly larger brain size, averaging around 900 to 1,100 cubic centimeters, compared to Homo

habilis, which had a brain size of approximately 510 to 600 cubic centimeters, indicating a higher level of cognitive development and more advanced tool-making capabilities.

True / False

6. **Answer:** False

Options: A) True; B) False

Note: The correct answer is: 2009

7. **Answer:** False

Options: A) True; B) False

Note: The correct answer is: Vistula River

8. **Answer:** False

Options: A) True; B) False

Note: The correct answer is: Carlisle

9. **Answer:** True

Options: A) True; B) False

Note: According to the passage: murder

10. **Answer:** False

Options: A) True; B) False

Note: The correct answer is: the world's first large-scale electrical supply network

Long Form Response

11. **Answer:** Roman times

Note: Expected answer: Roman times

12. **Answer:** Evie Hone

Note: Expected answer: Evie Hone
