

Multiple Choice

1. **Answer:** A

Options: A) Ahrensburg Complex; B) Solutrean Complex; C) Aurignacian Complex; D) Nenana Complex; E) Gravettian Complex

Note: The Ahrensburg Complex is characterized by its distinctive lithic technology that includes wedge-shaped cores and micro-blades, which are specifically associated with prehistoric cultures in the Arctic region.

2. **Answer:** A

Options: A) the discovery of an artifact in a museum or private collection; B) an archaeological site found underwater; C) a site where artifacts have been intentionally buried for preservation; D) all of the above; E) a site where artifacts have been moved and rearranged by humans or natural forces

Note: The discovery of an artifact in a museum or private collection indicates a primary context because it involves the original placement and preservation of the artifact, allowing for direct analysis of its historical significance and cultural relevance.

3. **Answer:** E

Options: A) inside a previously undiscovered pyramid.; B) in the depths of the ocean, near the remains of a sunken ship.; C) on a remote island, far from known human settlements.; D) on the surface, above the remains of extinct animals.; E) beneath the remains of extinct animals.

Note: Frere's discovery is significant because it provided evidence that ancient human artifacts coexisted with extinct animals, suggesting a much earlier timeline for human existence than previously believed.

4. **Answer:** A

Options: A) elite-sponsored feasts in which captives of war were beheaded.; B) public humiliation, forced labor, and consumption of hallucinogenic plants.; C) ritualistic battles, consumption of coca leaves, and bloodletting.; D) communal feasts and the torture of captives to be sacrificed.; E) improved diet, forced labor, and the use of coca leaves.

Note: The correct answer highlights the ritualistic nature of Inca human sacrifice, emphasizing that it was often integrated into elite-sponsored feasts that served both as a display of power and a means of justifying the sacrificial act, particularly involving captives of war.

5. **Answer:** E

Options: A) steadily worsened.; B) was invented during this period.; C) evolved into a more sophisticated technology.; D) remained static without any changes.; E) changed only slightly.

Note: Hand axe technology remained relatively stable during this period, as evidenced

by the continuity in design and function across various archaeological sites, indicating that while cultural practices may have evolved, the fundamental tool remained largely unchanged.
