

Multiple Choice

1. **Answer:** A

Options: A) was driven solely by population growth.; B) only occurred in Europe and Asia.; C) took hundreds of thousands of years.; D) always required careful planning.; E) happened everywhere except in South America.

Note: The transition from food gathering to agriculture was primarily driven by population growth, as increasing population densities created a greater demand for stable food sources, leading communities to adopt agricultural practices for sustainability and food security.

2. **Answer:** B

Options: A) natural disasters such as volcanic eruptions or earthquakes.; B) both humans and environmental changes.; C) the spread of invasive plant species which altered their habitat.; D) a sudden drastic climate change due to global warming.; E) humans who carried diseases over the land bridge.

Note: The extinction of Australian and American megafauna is attributed to the combined impact of human hunting and significant environmental changes during the Pleistocene epoch, which led to habitat loss and climate shifts that affected their survival.

3. **Answer:** A

Options: A) cranial reduction; B) decreased dentition; C) microcephaly; D) supraorbital cortex; E) encephalization

Note: Cranial reduction refers to the evolutionary trend where the size of the face and teeth decreased while brain size increased, suggesting a shift in dietary needs and social behavior that likely supported the development of larger brains in hominids like *Homo erectus*.

4. **Answer:** B

Options: A) hang-t'u.; B) scapulimancy; C) I Ching; D) Geomancy; E) Kau Cim

Note: Scapulimancy refers specifically to the practice of divining the future by examining the shoulder blades of animals, particularly in ancient Chinese culture, making it the accurate term for this historical practice.

5. **Answer:** A

Options: A) Ming Dynasty Ceramic Art; B) Qin manufacture; C) Han Stoneware; D) Lung-shan; E) Hangzhou Style

Note: The correct answer is not "Ming Dynasty Ceramic Art" but rather refers to the technique known as "rammed earth," which was employed in Chinese construction practices, particularly during the Ming Dynasty for building durable structures, including defensive walls and housing.

True / False

6. **Answer:** True

Options: A) True; B) False

Note: According to the passage: overseas territories remain under British sovereignty

7. **Answer:** False

Options: A) True; B) False

Note: The correct answer is: Jugurtha

8. **Answer:** True

Options: A) True; B) False

Note: According to the passage: The Elizabethan Club
