True / False (10 marks)

Answer True or False

6. True or False: The recovery of over 6,500 bones from a single hominid species at the Cave of the Bones provides unusually good evidence of diversity.
7. True or False: The Cordilleran ice mass was a significant Pleistocene glacier centered in the Rocky Mountains of North America.
8. True or False: Since the late 1800 s, mean global sea level has increased by about 20 centimeters (8 inches) and will continue to rise.
9. True or False: A landfill where refuse from an entire community has accumulated represents a primary context.
10. True or False: The Inca developed one of the earliest kingdoms in South America, reaching its height around AD 200.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the evidence that supports the idea that Neandertals were hunters, focusing on the significance of animal bones with stone tool cut marks and the absence of animal teeth marks.
12. Discuss the reasons behind the Mogollon's decision to leave their mountain homeland, focusing on the impact of environmental factors such as drought on their way of life.
