

Multiple Choice

1. **Answer:** E

Options: A) squash; B) knotweed; C) beans; D) sunflower; E) maize

Note: Maize was not an important component of Hopewell subsistence because the Hopewell culture primarily relied on hunting, gathering, and the cultivation of other crops such as squash and beans before maize became a staple in the region.

2. **Answer:** B

Options: A) natural disasters such as volcanic eruptions or earthquakes.; B) both humans and environmental changes.; C) the spread of invasive plant species which altered their habitat.; D) a sudden drastic climate change due to global warming.; E) humans who carried diseases over the land bridge.

Note: The extinction of Australian and American megafauna is attributed to a combination of human activities, such as hunting and habitat alteration, alongside significant environmental changes, including climate fluctuations, that collectively impacted these large species.

3. **Answer:** A

Options: A) mutilation and violence.; B) stars and comets.; C) infants and children.; D) modern technologies.; E) domesticated animals.

Note: Mayan art and iconography prominently feature depictions of mutilation and violence as a reflection of their cultural practices, including ritual sacrifice and warfare, which were integral to their religious beliefs and societal structure.

4. **Answer:** E

Options: A) Mousterian technology was focused on the production of scrapers.; B) Aurignacian technology was primarily used for creating stone tools.; C) Aurignacian technology was less advanced than Mousterian technology.; D) Mousterian technology produced more usable blade surface.; E) Aurignacian technology produced more usable blade surface.

Note: Aurignacian technology is characterized by the production of long, thin blades that provide a greater usable surface area for tools compared to the thicker flakes typical of Mousterian technology, thereby enhancing efficiency in tool-making and usage.

5. **Answer:** E

Options: A) 500,000 to 100,000 years ago.; B) 800,000 to 200,000 years ago.; C) 200,000 to 50,000 years ago.; D) 700,000 to 40,000 years ago.; E) 600,000 to 30,000 years ago.

Note: The correct answer is supported by fossil evidence and archaeological findings that indicate the emergence and existence of premodern Homo sapiens within the time-frame of 600,000 to 30,000 years ago, marking a significant period in human evolution and development.

True / False

6. **Answer:** False

Options: A) True; B) False

Note: The correct answer is: 4,500
