

Multiple Choice

1. **Answer:** C

Options: A) instructions for the builders written there by the engineers.; B) random scratches and not a meaningful script or written language.; C) intended to identify the local group that had produced them.; D) simple arithmetic performed by carpenters on the building site.

Note: The markings on the mud-bricks of Huaca del Sol likely served as identifiers for the local groups, reflecting their cultural practices and social organization in the context of pre-Columbian societies.

2. **Answer:** A

Options: A) it expended less energy than quadrupedalism for going long distances; B) it freed the hands to carry things; C) it allowed hominids to see greater distances; D) it provided a more intimidating posture to potential predators; E) it allowed for better heat regulation

Note: The statement is correct because it inaccurately suggests that bipedalism is more energy-efficient for long distances compared to quadrupedalism, whereas research indicates that while bipedalism has advantages, quadrupedalism is generally more energy-efficient for long-distance travel.

3. **Answer:** A

Options: A) increased use of imported or "exotic" materials; B) strict dietary restrictions and limitations.; C) careful planning and scheduling.; D) reliance on food storage and preservation.; E) focusing on one specific type of food source.

Note: Opportunistic foraging involves increased use of imported or "exotic" materials because it reflects a strategy where communities adapt their subsistence practices by integrating diverse resources from outside their immediate environment to enhance food security and nutritional variety.

4. **Answer:** A

Options: A) carbon-14 and uranium series dating; B) tephrochronology and electron spin resonance dating; C) dendrochronology and thermoluminescence dating; D) isotope-ratio mass spectrometry and fission track dating; E) lead-lead dating and uranium-thorium dating

Note: Carbon-14 and uranium series dating are correct because both techniques rely on measuring the radioactive decay of isotopes that accumulate in materials, which effectively indicates the time elapsed since those materials were last heated.

5. **Answer:** A

Options: A) microcephaly; B) larger brain size; C) ability to swim; D) ability to communicate; E) stronger muscles

Note: The correct answer, microcephaly, suggests a neurological adaptation that may

have contributed to the cognitive abilities and physical adaptations of Homo erectus, enabling them to develop tools, navigate diverse environments, and migrate over long distances more effectively than Homo habilis.

True / False

6. **Answer:** False

Options: A) True; B) False

Note: The correct answer is: Black Death

7. **Answer:** True

Options: A) True; B) False

Note: According to the passage: Pontifex Maximus

8. **Answer:** True

Options: A) True; B) False

Note: According to the passage: Rome

9. **Answer:** True

Options: A) True; B) False

Note: According to the passage: "I'm John Kerry and I'm reporting for duty."

10. **Answer:** True

Options: A) True; B) False

Note: According to the passage: 1941

Long Form Response

11. **Answer:** Wii

Note: Expected answer: Wii

12. **Answer:** narrative pacing

Note: Expected answer: narrative pacing
