

Multiple Choice

1. **Answer:** A

Options: A) Ahrensburg Complex; B) Solutrean Complex; C) Aurignacian Complex; D) Nenana Complex; E) Gravettian Complex

Note: The Ahrensburg Complex is recognized for its distinctive lithic technology characterized by wedge-shaped cores, micro-blades, bifacial knives, and burins, specifically associated with prehistoric cultures in the Arctic region.

2. **Answer:** E

Options: A) inside a previously undiscovered pyramid.; B) in the depths of the ocean, near the remains of a sunken ship.; C) on a remote island, far from known human settlements.; D) on the surface, above the remains of extinct animals.; E) beneath the remains of extinct animals.

Note: Frere's discovery is significant because it provided evidence that human artifacts coexisted with extinct animals, challenging the prevailing views of human history and the timeline of prehistoric life.

3. **Answer:** B

Options: A) Simple foragers employ domestication of animals.; B) Complex foragers focus on a few highly productive resources.; C) Complex foragers employ irrigation technology.; D) Simple foragers use advanced hunting techniques.; E) Complex foragers rely primarily on marine resources.

Note: The correct answer is based on the understanding that complex foragers develop specialized techniques and social structures to exploit a limited number of abundant resources, contrasting with simple foragers who rely on a broader range of less productive resources for subsistence.

4. **Answer:** E

Options: A) nearness of the site to navigable rivers and the Gulf coast.; B) proximity to other Paleoindian settlements.; C) presence of a large lake for fishing and transportation.; D) nearby location of migratory routes of large mammals such as bison.; E) proximity to a local source of chert for quarrying and making stone tools.

Note: The correct answer highlights that the Gault site was strategically selected by Paleoindians due to its closeness to a chert source, which was essential for crafting durable stone tools necessary for their survival and daily activities.

5. **Answer:** A

Options: A) a new type of metal alloy.; B) the earliest written documents.; C) the remains of a massive wooden ship believed to be Noah's Ark.; D) animal remains scattered on the surface of the ground.; E) the ruins of an ancient civilization under the sea.

Note: John Frere's discovery in 1797 of a new type of metal alloy was significant because

it contributed to the understanding of prehistoric metallurgy and the technological advancements of ancient societies.

True / False

6. **Answer:** False
Options: A) True; B) False
Note: The correct answer is: 19 th
7. **Answer:** True
Options: A) True; B) False
Note: According to the passage: Käfigturm
8. **Answer:** True
Options: A) True; B) False
Note: According to the passage: Sindh
9. **Answer:** False
Options: A) True; B) False
Note: The correct answer is: Isaac Newton
10. **Answer:** False
Options: A) True; B) False
Note: The correct answer is: 35,000 men

Long Form Response

11. **Answer:** molecular genetics and epigenetics
Note: Expected answer: molecular genetics and epigenetics
12. **Answer:** eastern North Carolina
Note: Expected answer: eastern North Carolina
