

Multiple Choice

1. **Answer:** A

Options: A) the construction of canals for irrigation; B) the creation of a trade network for llama products; C) the need to collect large quantities of shellfish; D) the building of the Piramide Mayor; E) the need for a centralized defense against invaders

Note: The construction of canals for irrigation is considered the key factor in the development of a complex society at Caral, as it enabled agricultural surplus, which supported population growth and the emergence of social hierarchies and trade networks.

2. **Answer:** C

Options: A) 40 residential complexes; 40,000; B) 50 religious monuments; 5,000; C) 120 earthen mounds; 10,000; D) 70 public squares; 7,000; E) 80 ceremonial mounds; 50,000

Note: correct because Cahokia, a significant pre-Columbian urban center located near present-day St. Louis, Missouri, is known for its construction of over 120 earthen mounds and had a population that peaked around 10,000, highlighting its importance in Native American history and urban development.

3. **Answer:** C

Options: A) monument for an Inca king.; B) hunting ground for Inca rulers.; C) relaxing getaway for elites.; D) military training base.; E) defensive stronghold.

Note: Machu Picchu was constructed as a luxurious retreat for Inca elites, reflecting their desire for a serene environment away from the political and social pressures of the capital, Cusco, while serving as a symbol of their power and connection to the divine.

4. **Answer:** A

Options: A) office; landfill; B) dining area; garbage disposal; C) bathroom; incinerator; D) kitchen; garden; E) playground; waste treatment plant

Note: The correct answer is based on the distinction between primary refuse, which is typically found in an office setting where immediate waste is generated, and secondary refuse, which accumulates in a landfill as a result of long-term waste disposal practices.

5. **Answer:** A

Options: A) a stable, long-lived species.; B) the first hominid to stand "erect" and walk upright.; C) a hominid species that was completely herbivorous.; D) the first hominid to develop agriculture.; E) an unsuccessful, short-lived species.

Note: Homo erectus is considered a stable, long-lived species because it existed for nearly 1.9 million years, demonstrating adaptability and resilience in various environments throughout its range.

True / False
