

Multiple Choice

1. **Answer:** C

Options: A) Slippery Slope; B) Hasty Conclusion; C) False sign; D) False analogy; E) Bandwagon Fallacy

Note: The term "ad crumenam" refers to a logical fallacy where one assumes that wealth or financial gain is indicative of truth or value, exemplifying it as a false sign because it misrepresents the relationship between economic status and the validity of propositions.

2. **Answer:** A

Options: A) "Dark-clad"; B) "Sun-clad"; C) "Earth-clad"; D) "Sky-clad"; E) "Fire-clad"

Note: The term "Svetambara," which translates to "dark-clad," refers to one of the two major sects of Jainism, characterized by its followers' practice of wearing white clothing, symbolizing purity and renunciation, while the term itself highlights the aesthetic distinction between the Svetambaras and the Digambaras, who traditionally practice nudity as a form of asceticism.

3. **Answer:** A

Options: A) all actions are morally equivalent.; B) it is permissible to harm as a foreseen but unintended consequence of action.; C) the ends justify the means.; D) individuals should always act in their own best interest.; E) the moral worth of an action is determined by its outcome.

Note: Nagel argues that the absolutist position holds that moral principles are universally applicable, leading to the conclusion that all actions, regardless of context or circumstance, carry the same moral weight, thus rendering them morally equivalent.

4. **Answer:** C

Options: A) encourage students to think pathologically.; B) ill-prepare them for the workforce.; C) harm their ability to learn.; D) all of the above.

Note: Lukianoff and Haidt argue that institutionalizing vindictive protectiveness stifles intellectual growth and resilience by creating an environment where individuals are shielded from challenging ideas and experiences, ultimately hindering their ability to learn effectively.

5. **Answer:** D

Options: A) we should refrain from imposing the death penalty.; B) the death penalty is a necessary evil.; C) murder is wrong.; D) we should institute death by torture.; E) capital punishment serves as a deterrent.

Note: Reiman argues that van den Haag's acceptance of capital punishment as a necessary deterrent implies that if one form of execution is justified for its deterrent effect, then more extreme forms, such as death by torture, could also be justified under the same rationale.

True / False

6. **Answer:** False

Options: A) True; B) False

Note: Philo actually acknowledges the strength of Cleanthes' analogy in his critiques, suggesting that it does provide substantial support for the argument concerning the existence of a designer, albeit with reservations regarding its limitations.

7. **Answer:** True

Options: A) True; B) False

Note: The statement is true because an argument from authority fallacy occurs when the validity of a claim is improperly based solely on the endorsement of an authority figure, rather than on substantive evidence or reasoning supporting the claim itself.

8. **Answer:** True

Options: A) True; B) False

Note: The statement is true because the notice from the Hyatt Regency Hotel presents conflicting information about the reservation conditions, leading to ambiguity about the obligations and rights of both the hotel and the guest.

9. **Answer:** False

Options: A) True; B) False

Note: The fallacy of amphiboly arises from ambiguous grammatical construction leading to misleading interpretations, while reification specifically pertains to attributing concrete existence to abstract concepts, making the two distinct fallacies.

10. **Answer:** False

Options: A) True; B) False

Note: Nagel argues that while absolutism generally upholds the moral prohibition against murder, it allows for nuanced considerations and exceptions in specific circumstances, such as self-defense or the protection of others.

Long Form Response

11. **Answer:** From the premises $\sim E$, $\sim F$, G , F , H , $\sim E$, H , I , and $\sim I$, we can deduce $\sim H$ as an immediate consequence. Firstly, the premise H , $\sim E$ suggests that either H is true or E is false. If we assume H is true, then according to H , I , I must also be true. However, the premise $\sim I$ contradicts this assumption, leading us to conclude that H cannot be true. Therefore, we are left with $\sim H$ as the only viable option. This deduction illustrates the principles of propositional logic, particularly the use of modus tollens, where the falsity of a consequent leads to the falsity of its antecedent.

Note: correct because it employs logical deduction by demonstrating that the truth of H leads to a contradiction with $\sim I$, thereby necessitating the conclusion that H must be false, or $\sim H$ is true, which exemplifies the application of propositional logic principles.

12. **Answer:** Augustine's assertion that evil cannot exist without love posits that love, as a fundamental positive force, is essential for the conception of evil. He argues that evil is a perversion of the good, arising when love is misdirected or distorted, suggesting that love inherently seeks fulfillment and goodness. This implies that evil is parasitic; it necessitates a prior existence of love, which points to the complexity of human desire and moral choices. In philosophical discourse, this understanding reframes evil not as an independent entity but as a deviation from the good, thus highlighting the relational dynamics of love and moral failure. Consequently, it emphasizes the necessity of directing love towards the good to mitigate the potential for evil.

Note: correct because it articulates Augustine's view that evil is a distortion of love and goodness, emphasizing that evil cannot exist independently but rather relies on the presence of love, thereby enriching the philosophical understanding of moral choices and human desire.
