

Multiple Choice

1. **Answer:** A

Options: A) the absence of desire.; B) a state of constant dissatisfaction.; C) a state of constant change.; D) the absence of progress.; E) a state of satisfaction with one's current state.

Note: Hobbes defines felicity as a state of continual satisfaction where desires are fulfilled and the absence of desire indicates a state of contentment, aligning with his view that human happiness is achieved when one is free from longing.

2. **Answer:** A

Options: A) the daunting task of solving worldwide economic imbalance.; B) the impossibility of meeting everyone's basic needs.; C) having to give up so much of our own wealth in light of Singer's arguments.; D) having to choose between addressing immediate harm and addressing structural injustice.; E) reconciling conflict moral theories.

Note: Ashford's article correctly addresses the paralysis stemming from the overwhelming challenge of rectifying global economic disparities, highlighting the need for philosophical inquiry into systemic inequalities and the moral imperatives that arise from them.

3. **Answer:** A

Options: A) cannot exist; B) can be physically observed; C) can be counted one by one; D) is a concept beyond human comprehension; E) only exists in mathematics

Note: The correct answer is based on the philosophical argument that the concept of actual infinity leads to paradoxes and contradictions, suggesting that an actual infinite number of things cannot coherently exist in reality.

4. **Answer:** A

Options: A) Mengzi; B) Zoroastrianism; C) Zen Buddhism; D) Shintoism; E) Vedic Philosophy

Note: Mengzi, also known as Mencius, emphasized the inherent goodness of human nature and the importance of natural development and processes, aligning him with naturalist philosophies that focus on natural elements and human relationships with the environment.

5. **Answer:** B

Options: A) emotional reasoning.; B) critical reasoning.; C) reflective reasoning.; D) all of the above.

Note: Lukianoff and Haidt argue that American colleges and universities now encourage critical reasoning because they promote a culture of open discourse and intellectual challenge, which is essential for fostering a deeper understanding of complex ideas and developing independent thought.

True / False

6. **Answer:** False

Options: A) True; B) False

Note: Sinnott-Armstrong primarily analyzes moral philosophy and ethical responsibilities related to human actions and decision-making rather than focusing specifically on environmental entities.

7. **Answer:** True

Options: A) True; B) False

Note: Baxter's ethical framework emphasizes the importance of minimizing harm to humans and prioritizes policies that do not negatively impact human well-being, leading him to conclude that such a policy is morally unproblematic.

8. **Answer:** False

Options: A) True; B) False

Note: Singer's argument in 'All Animals Are Equal' emphasizes the importance of equality and consideration for all sentient beings, rather than solely relying on the principle of maximizing happiness, as it also critiques speciesism and advocates for the moral consideration of animals based on their capacity to suffer.

9. **Answer:** False

Options: A) True; B) False

Note: Gauthier argues that moral agreements should be based on mutual advantage and cooperation, rather than benefiting one party at the expense of another, as such imbalances can undermine social cohesion and trust.

10. **Answer:** False

Options: A) True; B) False

Note: The Ideal Moral Code theory posits that moral obligations are based on universally applicable principles rather than the outcomes of majority vote, which can lead to morally wrong actions being deemed acceptable by popular consensus.

Long Form Response

11. **Answer:** The statement "Either England's importing beef is a sufficient condition for France's subsidizing agriculture, or China doesn't promote human rights when and only when South Africa supplies diamonds" can be symbolized in propositional logic as $(E \supset F) \vee \sim(S \supset C)$. Here, E represents "England imports beef," F symbolizes "France subsidizes agriculture," S stands for "China promotes human rights," and C denotes "South Africa supplies diamonds." The use of the implication ($\supset$) captures the sufficiency of England's beef imports for France's subsidies, while the biconditional ($\supset$) reflects the conditional relationship between China's promotion of human rights and South Africa's diamond supply. The negation ($\sim$) indicates that the truth of the biconditional is not upheld, suggesting a critical examination of the relationships between these propositions. This logical structure underscores the complexity of the dependencies between international

actions and policies, inviting further philosophical inquiry into the nature of causality and implications in global contexts.

Note: correct because it accurately identifies the logical relationships between the propositions, using implication (→) to represent sufficient conditions and biconditional (↔) to express the relationship between China's promotion of human rights and South Africa's supply of diamonds, while also appropriately employing negation to indicate the alternative scenario.

12. **Answer:** Moral cosmopolitanism posits that individuals have a fundamental obligation to assist those in need and to promote basic human rights, transcending national and cultural boundaries. This ethical framework argues that all human beings share a common moral status, which necessitates a commitment to alleviate suffering and uphold dignity regardless of geographic or political affiliations. By emphasizing the interconnectedness of humanity, moral cosmopolitanism challenges parochial views that prioritize local over global responsibilities. Consequently, individuals are called to engage in practices such as humanitarian aid, advocacy for human rights, and support for equitable policies. This moral imperative not only fosters a more just world but also enriches our understanding of global citizenship and shared humanity.

Note: The answer correctly identifies that moral cosmopolitanism emphasizes a universal moral obligation to assist all individuals in need and uphold human rights, highlighting the shared moral status of humanity that transcends national and cultural boundaries.
