

Multiple Choice

1. **Answer:** A

Options: A) 1955; B) 1985; C) 1975; D) 1990; E) 2000

Note: The current Dalai Lama, Tenzin Gyatso, was born on July 6, 1935, and is often referenced as having been recognized in 1955, which is relevant in discussions of his early life and the historical context of Tibetan Buddhism.

2. **Answer:** C

Options: A) Toward the end of the first millennium BCE; B) Towards the middle of the first millennium BCE; C) Toward the end of the second millennium BCE; D) Toward the middle of the second millennium BCE; E) At the start of the second millennium BCE

Note: The Old Babylonian version of Gilgamesh was modified into the standard version toward the end of the second millennium BCE as this period marked significant cultural and literary developments in Mesopotamia, leading to the consolidation of earlier texts into a unified narrative.

3. **Answer:** A

Options: A) peace.; B) virtue.; C) Godliness.; D) wisdom.; E) happiness.

Note: Aquinas posits that true fulfillment and ultimate perfection in human action is achieved through the attainment of peace, as it represents the harmonious state of being that aligns with both moral virtue and the divine order.

4. **Answer:** D

Options: A) false cause; B) red herring; C) argumentum ad populum; D) jumping to a conclusion; E) ad novitatem

Note: The correct answer is "jumping to a conclusion" because both terms refer to the logical fallacy of making a conclusion based on insufficient or premature evidence, which undermines the validity of the argument.

5. **Answer:** C

Options: A) monism; B) functionalism; C) identity theory; D) dualism; E) brain theory

Note: The identity theory posits that mental states and brain states are identical, asserting that every mental experience corresponds directly to a specific physical state in the brain, thus making it the correct answer to the question.

True / False

6. **Answer:** True

Options: A) True; B) False

Note: Paley asserts that the complexity and purposeful design observed in nature, such as the intricate functioning of living organisms, cannot be attributed to human craftsmanship, as it arises from a natural intelligence or divine creator rather than human intention and manufacture.

7. **Answer:** True

Options: A) True; B) False

Note: The statement is true because asserting what one does not believe creates a fundamental conflict between one's internal convictions and external expressions, thus violating the principle of authenticity which is central to moral integrity.

8. **Answer:** False

Options: A) True; B) False

Note: Lukianoff and Haidt argue that an excessive focus on microaggressions can stifle open dialogue and create a culture of fear, ultimately undermining inclusivity in academic environments.

9. **Answer:** True

Options: A) True; B) False

Note: A faulty analogy occurs when the differences between the items being compared outweigh their similarities, rendering the comparison invalid and undermining the argument's logical foundation.

10. **Answer:** False

Options: A) True; B) False

Note: Altman contends that justifications of speech codes based on causal harm are inadequate because they fail to account for the complexities of free speech and its role in fostering open discourse.

Long Form Response

11. **Answer:** Little's perspective on the ethical implications of terminating a pregnancy emphasizes the importance of familial and social conditions in making such a decision. He argues that when a potential child would not be welcomed into a loving and supportive environment, terminating the pregnancy can be seen as an act of respect for both the child and the existing family dynamics. This view challenges traditional norms surrounding procreation by suggesting that the moral responsibility of potential parents extends beyond mere biological capability to encompass the quality of life and emotional readiness for parenthood. Ultimately, Little's argument reveals that the norms of creation are not solely about the act of giving life but also about ensuring that life is nurtured in conditions conducive to well-being.

Note: Little's perspective correctly highlights that the ethical implications of terminating a pregnancy are deeply intertwined with the quality of familial and social conditions, advocating that responsible procreation requires consideration of the child's potential environment and the well-being of existing family members.

12. **Answer:** The fallacy of complex propositions arises when an argument involves multiple interconnected claims, and supporting only one part can lead to misleading conclusions about its overall validity. In philosophical discourse, a complex proposition might assert that "If A is true, then B and C must also be true." By affirming A while neglecting the necessity of examining both B and C, one risks drawing an invalid conclusion that A guarantees B and C without fully addressing their interdependence. This selective support can distort the argument's integrity, as it overlooks the implications of the unexamined components. Thus, the failure to analyze all parts of a complex proposition can result in a superficial understanding of the argument's true nature and validity.

Note: correct because it illustrates how affirming only one component of a complex proposition can obscure the interconnectedness of claims, leading to invalid conclusions about the overall truth of the proposition.
