

Multiple Choice

1. **Answer:** A

Options: A) TlcL; B) cTL; C) lTc; D) Tll; E) cTl

Note: The correct answer TlcL accurately represents the relationship "Leo is taller than Cathy" by using the predicate logic notation where Txy denotes that x is taller than y, with l assigned to Leo and c assigned to Cathy.

2. **Answer:** C

Options: A) useless.; B) valid.; C) ad hominem.; D) sound.

Note: Hare's assertion that all moral arguments are ad hominem suggests that they inherently rely on the character or motives of the individual rather than the objective merits of the argument itself, highlighting the subjective nature of moral reasoning.

3. **Answer:** A

Options: A) ectoplasm; B) the amygdala; C) the hypothalamus; D) the nervous system; E) the brain stem

Note: The correct answer is ectoplasm because Descartes proposed that the interaction between the immaterial mind and the physical body occurred at the pineal gland, which he referred to using the term ectoplasm to describe the substance facilitating this dualistic interaction.

4. **Answer:** A

Options: A) wealth.; B) virtue.; C) fairness.; D) pleasure.; E) peace.

Note: Moore's "ideal utilitarianism" posits that the right action is determined by the promotion of intrinsic goods, such as wealth, which he considers a fundamental aspect of well-being and happiness.

5. **Answer:** A

Options: A) libertarian duties towards the global poor; B) positive duties towards the global poor; C) duty-free towards the global poor; D) liberal duties towards the global poor; E) consequentialist duties towards the global poor

Note: Pogge contends that affluent individuals in wealthy nations bear libertarian duties to address the harms caused by global injustices, emphasizing the moral obligation to rectify the inequalities that their actions perpetuate.

True / False

6. **Answer:** True

Options: A) True; B) False

Note: Hare characterizes fanatics as individuals who prioritize their own ideals to the

extent that they disregard the welfare and perspectives of others, which aligns with the assertion in the statement.

7. **Answer:** True

Options: A) True; B) False

Note: Cicero argues that immorality contradicts the natural order and rationality inherent in human nature, while actions that align with expedience reflect the virtues of justice and the common good as prescribed by nature.

8. **Answer:** False

Options: A) True; B) False

Note: Mani's teachings emphasize the duality of divine essence and the material world, portraying God not merely as the Grand Architect of creation but as an integral, transcendent force that embodies both the spiritual and physical realms.

9. **Answer:** False

Options: A) True; B) False

Note: Epicurus believed that true wealth is found in the pursuit of simple pleasures and the cultivation of friendships, rather than in the relentless accumulation of material possessions.

10. **Answer:** False

Options: A) True; B) False

Note: The Tanakh is the canonical collection of Jewish texts, which includes the Torah, Prophets, and Writings, while rabbinical commentaries produced after the Mishnah, such as the Talmud, are interpretations and discussions that expand on the texts of the Tanakh rather than being part of it.

Long Form Response

11. **Answer:** Dershowitz's argument that critical decisions, such as authorizing the shooting down of hijacked planes, should be made by a single individual underscores the importance of accountability in moral and legal frameworks. By assigning this weighty responsibility to one person, the decision-making process is streamlined, allowing for clearer lines of responsibility and ethical accountability. This approach can mitigate the diffusion of responsibility that often occurs in group decision-making, where individual moral culpability can become obscured. Moreover, it emphasizes the need for decisive leadership in high-stakes situations, where the consequences of inaction or miscalculation can have catastrophic outcomes. Ultimately, the concentration of decision-making authority in a single individual may enhance the moral clarity and urgency required in such grave circumstances.

Note: The answer correctly emphasizes that assigning critical decision-making to a single individual enhances accountability and clarity in moral and legal responsibilities, reducing the risk of diluted responsibility that can arise in collective decision-making.

12. **Answer:** Dershowitz's perspective on deontological ethics suggests that in extreme cases, one might justify acts of terrorism if they are seen as fulfilling a moral duty or obligation that supersedes immediate consequences. He argues that certain deontological frameworks prioritize the adherence to moral rules over the outcomes of actions, positing that if the intention behind the act aligns with a higher moral law-such as the defense of a community or the pursuit of justice-then terrorism could be rationalized. This application raises significant implications for moral philosophy, challenging the traditional view that deontological ethics strictly condemns all forms of violence. It invites a critical examination of how ethical frameworks can be manipulated to support harmful actions under the guise of moral imperatives, thereby highlighting the complexity and potential dangers of rigidly adhering to deontological principles in real-world scenarios.

Note: correct because it accurately captures Dershowitz's argument that deontological ethics can permit acts of terrorism in extreme situations when such actions are framed as fulfilling a higher moral duty, thereby emphasizing the primacy of intention and moral obligation in ethical decision-making.
