

Multiple Choice (10 marks)

1. According to Velleman, who, if anyone, should decide whether a patient receives euthanasia?
 - (a) a court of law
 - (b) the hospital administration
 - (c) no one, it should not be allowed under any circumstance
 - (d) the patient's caregiver
 - (e) a medical ethics committee
2. The version of utilitarianism that Brandt defends makes rightness a function of:
 - (a) the amount of harm caused by an action.
 - (b) whether or not one's maxim can be universalized.
 - (c) the moral character of the person performing the action.
 - (d) the distribution of wealth in society.
 - (e) the consequences of particular acts.
3. Mill claims that the principle of utility:
 - (a) can only be proven through extensive observation and study.
 - (b) can be proven from principles that are known empirically.
 - (c) can be proven, but only under certain conditions.
 - (d) is inherently flawed and therefore cannot be proven.
 - (e) is a theory that has been widely disproven.
4. Another name for the fallacy of accident is
 - (a) Red herring
 - (b) Slippery slope
 - (c) Either-or fallacy
 - (d) Straw man argument
 - (e) Hasty generalization
5. Huemer argues that there is no reason to think that the harms of drug use are in an important sense
 - (a) more harmful on average than legally permitted harmful activities.
 - (b) differing from the harms of other legally permitted harmful activities.

- (c) more detrimental to a person's character than others legally permitted harmful activities.
- (d) All of the above.

True / False (10 marks)

Answer True or False

- 6. True or False: The fallacy of significance is primarily concerned with emotional appeals rather than the integrity of statistical evidence.
- 7. True or False: Foot's Rescue I and Rescue II cases argue that all harmful sequences stem from the absence of good intentions.
- 8. True or False: The hijab is primarily worn today as a form of Islamic rebellion against Western cultural norms and values.
- 9. True or False: The fallacy of Extension occurs when one critiques an argument for failing to achieve an aim it was never meant to fulfill.
- 10. True or False: Attacking the person (ad hominem) refers to presenting irrelevant personal information to undermine an argument's validity.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Analyze the logical structure of the statement: "Since the university raised tuition, the president approved of it and the board didn't prevent it." How can this be symbolized in propositional logic? Discuss your reasoning.
- 12. Analyze the given premises $A \rightarrow (B \cdot C)$, $\sim(B \cdot C)$, and $A \rightarrow (D \rightarrow B)$. What immediate conclusion can be drawn from these premises, and what implications does this conclusion have for the validity of A?
