

Multiple Choice

1. **Answer:** C

Options: A) monism; B) functionalism; C) identity theory; D) dualism; E) brain theory

Note: The identity theory posits that mental states are identical to physical brain states, asserting that every mental phenomenon corresponds directly to a specific neurological condition.

2. **Answer:** A

Options: A) advantage or benefit to the user.; B) usefulness for some craft.; C) the ability to satisfy wants and needs.; D) usefulness to an individual.; E) it promotes the interests of all and does not harm anyone.

Note: Mill's definition of "utility" centers on the idea that it pertains to the overall advantage or benefit derived from actions or policies, emphasizing that the moral value of an action is determined by its contribution to human well-being.

3. **Answer:** D

Options: A) Reification; B) Slippery slope; C) Begging the question; D) Misusing ambiguity; E) False cause

Note: The fallacy of amphiboly occurs when ambiguity in sentence structure leads to misleading interpretations, which aligns with the concept of misusing ambiguity.

4. **Answer:** A

Options: A) a kind of consistency test.; B) an instruction for determining the legality of an action.; C) a way to measure the value of an action's consequences.; D) a criterion for social acceptability.; E) a protocol for interpersonal communication.

Note: Kant's Universal Law formulation serves as a consistency test because it requires that an action can be universally applied as a moral law, independent of individual desires or preferences, thereby ensuring that moral principles are grounded in reason rather than subjective inclinations.

5. **Answer:** B

Options: A) can be proven false with logical reasoning.; B) are independent: You can accept either part without accepting the other.; C) are based purely on empirical evidence.; D) are not open to debate or disagreement.; E) cannot be justified via rational means.

Note: Rawls' theory consists of the principles of justice and the idea of the original position, which are structured to allow for independent acceptance, meaning one can endorse the justice principles without necessarily subscribing to the original position framework or vice versa.

True / False

6. **Answer:** False

Options: A) True; B) False

Note: Nussbaum argues that cross-cultural communication is often approached with an emphasis on understanding and valuing diverse perspectives rather than nihilism, which dismisses the validity of differing conceptual schemes.

7. **Answer:** False

Options: A) True; B) False

Note: Lukianoff and Haidt argue that trigger warnings are intended to promote awareness and sensitivity to potentially distressing content, rather than fostering a simplistic dichotomy or black-and-white thinking about complex issues.

8. **Answer:** True

Options: A) True; B) False

Note: The statement is true because the appeal to anonymous authority fallacy undermines the credibility of a claim by relying on unnamed experts, which prevents the audience from evaluating the legitimacy and qualifications of the source.

9. **Answer:** False

Options: A) True; B) False

Note: The major shift by Greek philosophers who rejected the anthropomorphic view of the divine began earlier, notably in the Sixth Century BCE with thinkers like Xenophanes and was further developed by philosophers such as Socrates and Plato, rather than occurring solely in the late Fourth Century BCE.

10. **Answer:** False

Options: A) True; B) False

Note: Singer's principle of equality emphasizes equal consideration of interests rather than identical treatment, recognizing that individuals' circumstances may warrant different responses to ensure fairness and justice.

Long Form Response

11. **Answer:** The concept of "gradual enlightenment" in Soto Zen emphasizes the importance of steady, incremental progress in spiritual practice rather than sudden, dramatic awakenings. This perspective aligns with the broader Zen philosophy that values the cultivation of mindfulness and awareness in everyday life, suggesting that enlightenment is not a singular event but a continuous process of deepening understanding. In Soto Zen, practitioners engage in zazen (sitting meditation) as a means to develop this gradual insight, highlighting the significance of patience and perseverance in one's spiritual journey. This approach encourages individuals to appreciate the subtle changes in their awareness and behavior, fostering a more profound connection with the present moment and an enduring transformation in their lives. Ultimately, gradual enlightenment serves as a reminder that spiritual growth is often a slow and personal journey,

shaped by consistent practice and reflection.

Note: correct because it accurately captures the essence of "gradual enlightenment" in Soto Zen as a process of continuous growth through mindfulness and meditation, reflecting the broader Zen philosophy that emphasizes the importance of incremental development over sudden realizations.

12. **Answer:** The logical structure of the sentence can be analyzed through its components: it presents a disjunction between two complex propositions. The first part, "England's importing beef is a sufficient condition for France's subsidizing agriculture," can be formalized as $E \supset F$, indicating that if England imports beef, then France will subsidize agriculture. The second part, "China doesn't promote human rights when and only when South Africa supplies diamonds," translates to $\sim (S \equiv C)$, meaning that the absence of human rights promotion by China occurs if and only if South Africa provides diamonds. The overall statement, therefore, is expressed as $(E \supset F) \vee \sim (S \equiv C)$. This formalization highlights the interdependence of international actions and policies, suggesting a complex interplay of economic and ethical considerations across nations. *Note:* The answer correctly identifies the logical structure of the original sentence as a disjunction of two propositions, formalizes them using propositional logic, and elucidates the relationships between the conditions specified, thereby demonstrating an understanding of sufficient conditions and biconditional statements.
