

Multiple Choice

1. **Answer:** D

Options: A) Both encourage world government; B) Both focus on the decline of the American power; C) It doesn't - the two are fundamentally opposed; D) Both can be viewed as different means of achieving the same liberal ends

Note: Exceptionalism suggests that both isolationist and internationalist strategies, despite their differing approaches, ultimately aim to promote and protect a nation's liberal values and interests on the global stage.

2. **Answer:** D

Options: A) Congress asserted its primacy in foreign policy; B) US foreign policy became substantially decentralized; C) The Presidency welcomed the influence of Congress; D) None of the above

Note: The relationship between President George H.W. Bush and Congress was characterized by a mix of cooperation and conflict, while Bill Clinton experienced significant partisan divisions resulting in a contentious relationship, demonstrating that the dynamics during their administrations do not align with the options provided in the question.

3. **Answer:** B

Options: A) The character of a state's leader; B) The distribution of power in the international system; C) The distribution of power within a state's governmental system; D) A state's political ideology

Note: The distribution of power in the international system shapes states' foreign policy decisions by influencing their capabilities, interests, and strategies in response to the behavior of other states.

4. **Answer:** A

Options: A) Critical questioning.; B) Realist logic.; C) State-centric security analysis.; D) All of these options.

Note: Critical questioning represents a move away from traditional interpretations of security studies by challenging established norms and assumptions, thereby broadening the understanding of security beyond state-centric and military-focused perspectives.

5. **Answer:** A

Options: A) the Central Intelligence Agency (CIA).; B) the Federal Bureau of Investigation (FBI).; C) the National Security Council.; D) Both A and B are correct.

Note: The Central Intelligence Agency (CIA) is specifically tasked with gathering, analyzing, and disseminating intelligence about foreign nations, thereby providing essential information that informs and shapes U.S. foreign policy decisions.

True / False

6. **Answer:** True

Options: A) True; B) False

Note: The statement is true because, from the founding of the nation through the early 20 th century, the United States primarily adhered to a policy of avoiding entanglements in foreign conflicts and alliances, reflecting a preference for isolationism in its foreign relations.

7. **Answer:** False

Options: A) True; B) False

Note: The concept of human security extends beyond traditional military strategies and state-level conflicts by emphasizing the protection and empowerment of individuals and communities from a range of threats, including economic, environmental, and social issues.

8. **Answer:** False

Options: A) True; B) False

Note: The 'New Populism' often prioritizes nationalist sentiments and isolationist policies over direct incorporation of public opinion, leading to a divergence from traditional democratic processes in foreign policy making.

9. **Answer:** True

Options: A) True; B) False

Note: Economic, regime, environmental, and human security are interconnected with energy security because the availability and reliability of energy resources directly influence economic stability, governmental functionality, environmental sustainability, and the overall well-being of populations.

10. **Answer:** True

Options: A) True; B) False

Note: American exceptionalism fosters the belief in the superiority of the U.S. economic model, which prioritizes free market principles and competition, thereby encouraging the promotion of liberalized global trade policies that align with these values.

Long Form Response

11. **Answer:** The concept of 'energy security nexus' in the international system highlights the critical interplay between energy resources and state security policies, driven by the uneven geographical distribution of these resources. States rich in energy supplies often find themselves in a position of power, shaping their foreign relations and security strategies to leverage their resources, while those with limited access to energy become increasingly dependent on imports, leading to vulnerability. This dependency can result in complex inter-state relationships characterized by alliances, competition, and sometimes conflict over access to energy resources. Consequently, energy security becomes a pivotal aspect of national security strategies, prompting states to adopt policies

that ensure stable energy supplies, diversify energy sources, and mitigate geopolitical risks associated with energy dependence. Thus, the energy security nexus not only influences bilateral and multilateral relationships but also shapes broader security dynamics within the international system.

Note: The answer correctly identifies that the uneven distribution of energy resources creates disparities in power dynamics between states, influencing their foreign relations and security policies, where energy-rich states can leverage their resources for influence, while energy-poor states face dependency and vulnerability.

12. **Answer:** The 'Philadelphian System,' characterized by its emphasis on democratic governance and individual rights, serves as a quintessential example of American exceptionalism, particularly when juxtaposed with European political frameworks. Designed as the antithesis of European politics, which often relied on monarchy and aristocracy, this system prioritized popular sovereignty and the rule of law. By establishing a government that derived its authority from the consent of the governed, the Philadelphian System underscored the belief in the unique capacity of the American people to self-govern. This contrasts sharply with the entrenched hierarchies of Europe, reflecting a foundational commitment to liberty and egalitarianism that has come to define American identity. Ultimately, the Philadelphian System illustrates how America sought to create a political model that not only diverged from but also critiqued European practices, reinforcing the narrative of exceptionalism.

Note: correct because it highlights the fundamental differences between the 'Philadelphian System' and European political systems, emphasizing the American principles of democratic governance, individual rights, and popular sovereignty that exemplify American exceptionalism.
