

Multiple Choice

1. **Answer:** A

Options: A) Withdrawal of economic trade rights with the domestic market.; B) Export controls protecting technological advantage and further foreign policy objectives.; C) Control of munitions and arms sales.; D) Import restrictions to protect a domestic market from foreign goods.

Note: The withdrawal of economic trade rights with the domestic market is the odd one out because it directly affects internal economic relations, whereas the other options typically pertain to external economic measures impacting security policy.

2. **Answer:** D

Options: A) Ideological differences; B) A power vacuum; C) The expansionist nature of the Soviet Union; D) Both b and c

Note: The correct answer is both b and c because Realists argue that the Cold War was driven by the inherent power struggle between the United States and the Soviet Union, rooted in their conflicting national interests and the anarchic structure of the international system, leading to a security dilemma that escalated tensions and competition.

3. **Answer:** C

Options: A) Economic protectionism; B) Class consciousness; C) The search for new markets; D) Superstructure

Note: The Marxist perspective asserts that US foreign policy is primarily driven by the capitalist need to expand markets and secure resources, as this expansion is essential for sustaining economic growth and profitability within a capitalist system.

4. **Answer:** B

Options: A) The US ignored the Third World; B) Local developments were viewed through a geopolitical lens; C) The US unreservedly supported decolonization; D) None of the above

Note: The Cold War context led the United States to interpret events in the Third World primarily through a geopolitical lens, viewing local developments as either aligning with or opposing the interests of the capitalist West versus the communist East, thus influencing foreign policy and perceptions of those regions.

5. **Answer:** B

Options: A) the Senate.; B) the president.; C) the Secretary of State.; D) the chairman of the Joint Chiefs.

Note: The president holds the power to accord official recognition to other countries as part of the executive branch's role in conducting foreign policy, a function established by the U.S. Constitution.

True / False

6. **Answer:** True

Options: A) True; B) False

Note: The principle of sovereignty is often viewed as a barrier to intervention in the responsibility to protect framework, which prioritizes the protection of populations over state sovereignty in cases of mass atrocities.

7. **Answer:** True

Options: A) True; B) False

Note: Malware is designed with malicious intent to exploit vulnerabilities in systems, allowing hackers to gain unauthorized access and compromise data security, which aligns with its classification as a hacker tool.

8. **Answer:** True

Options: A) True; B) False

Note: Research indicates that factors such as security concerns, technological capability, and international relations play a more critical role in a state's decision to develop nuclear weapons than its regime type alone.

9. **Answer:** False

Options: A) True; B) False

Note: Cyber-crime encompasses a wide range of illegal activities conducted through digital means, including identity theft, financial fraud, and cyberbullying, that are not necessarily related to threats against national security.

10. **Answer:** False

Options: A) True; B) False

Note: This statement is false because, as of 2023, there are over nine recognized states with nuclear weapons, including the United States, Russia, China, France, the United Kingdom, India, Pakistan, North Korea, and Israel.

Long Form Response

11. **Answer:** Wendt's Lockean culture of anarchy is characterized by a rivalry among states, where actors perceive each other as competitors yet maintain a degree of restraint in their interactions, particularly regarding the use of violence. This culture has been dominant since the establishment of the modern system of states, influencing state behavior by promoting a calculated approach to conflict and diplomacy. States recognize their mutual interests and the potential consequences of unchecked aggression, leading to a more stable international environment despite the underlying competition. Consequently, this framework encourages cooperation and the establishment of norms and institutions that mitigate risks, thereby shaping the dynamics of international relations in a way that balances rivalry with order.

Note: correct because it accurately identifies Wendt's Lockean culture of anarchy as

a competitive yet restrained framework that shapes state behavior through an understanding of mutual interests and the consequences of aggression, thereby influencing contemporary international relations.

12. **Answer:** Offshore Balancing as a grand strategy emphasizes the importance of embracing multi- polarity in international relations, whereby the United States refrains from extensive military engagements and interventions, instead allowing regional powers to take the lead in maintaining stability within their own spheres. This approach entails a significant shift towards international restraint, advocating that the U.S. should limit its direct involvement in conflicts and encourage other states to assume greater responsibility for their own security. The implications of this strategy are profound; by fostering a more equitable distribution of security burdens, it not only reduces the risks of overextension and entanglement for the U.S. but also promotes the emergence of a self-sufficient international order. Ultimately, Offshore Balancing seeks to mitigate the potential for conflict while enabling the U.S. to focus on its core interests and strategic priorities, reflecting a pragmatic approach to global engagement.

Note: correct because it accurately outlines Offshore Balancing's core principle of promoting multi-polarity and regional autonomy in security matters, highlighting its implications for reducing U.S. military interventions and encouraging local powers to manage stability within their regions.
