Long Form Response

11. **Answer:** Historically, the roles of women in warfare were overlooked in security studies primarily because their contributions were framed in relation to the state rather than as individuals or as women. This perspective often reduced women's involvement to their impact on national security or military outcomes, neglecting their agency and experiences as combatants, victims, or supporters of war efforts. By prioritizing state-centric narratives, scholars and policymakers failed to acknowledge the complex realities of women's participation in conflict. The late 20 th century saw a gradual shift in focus, as feminist theories began to challenge these traditional frameworks, emphasizing the importance of recognizing women's diverse roles and contributions in warfare. This shift has allowed for a more nuanced understanding of warfare that includes the perspectives and experiences of women.

Note: correct because it emphasizes that the state-centric framing in security studies diminished the recognition of women's individual agency and diverse roles in warfare, leading to their historical marginalization in discussions of conflict and security.

12. **Answer:** A comprehensive understanding of terrorism and its implications for political science involves various techniques and targets that illuminate the motivations, methods, and consequences of terrorist activities. This multifaceted approach allows political scientists to assess the root causes of terrorism, its impact on international relations, and the effectiveness of counterterrorism strategies. Ultimately, integrating these techniques and targets enriches the discourse on terrorism, leading to more informed policy decisions and a deeper understanding of global security dynamics.

Note: correct because it identifies both qualitative and quantitative research methods as essential for analyzing terrorism, while also emphasizing the importance of examining various targets to fully grasp the motivations and impacts of terrorist actions within political science.
