

Multiple Choice

1. **Answer:** D

Options: A) Both encourage world government; B) Both focus on the decline of the American power; C) It doesn't - the two are fundamentally opposed; D) Both can be viewed as different means of achieving the same liberal ends

Note: Exceptionalism links isolationist and internationalist strategies by suggesting that both approaches, despite their differing methods, ultimately aim to promote and protect liberal values such as democracy and individual rights on the global stage.

2. **Answer:** D

Options: A) Human security is neo-colonial.; B) Human security promotes global capitalism.; C) Human security is too broad.; D) All of these options.

Note: The answer "All of these options" is correct because the human security concept is often criticized for its vagueness, lack of a clear framework for implementation, and potential to divert attention from traditional state security issues, all of which are common critiques.

3. **Answer:** D

Options: A) Receipt of sensitive nuclear assistance; B) Wealth/GDP; C) Rivalry with a nuclear state; D) Regime type

Note: Regime type is not a good predictor of which states will acquire nuclear weapons because historical evidence shows that both democratic and authoritarian regimes have pursued nuclear capabilities based on a variety of strategic and security considerations rather than solely their political structure.

4. **Answer:** C

Options: A) Creation of the Department of Homeland Security; B) Moving the Department of Defense Intelligence Agencies to the CIA for better coordination; C) Creation of the National Intelligence Director; D) Moving the domestic intelligence component of the FBI to the CIA

Note: The creation of the National Intelligence Director was proposed by the 9/11 Commission to enhance coordination and oversight within the U.S. intelligence community, addressing the fragmented structure that contributed to the failures in intelligence leading up to the September 11 attacks.

5. **Answer:** B

Options: A) which special interest groups have endorsed which candidates; B) the relative strength of each candidate's support, as indicated by public opinion polls; C) candidates' positions on international issues; D) candidates' positions on domestic issues

Note: The correct answer is justified because television network news coverage often

emphasizes public opinion polls, providing viewers with a clear understanding of the candidates' relative support and positioning in the electoral landscape.

True / False

6. **Answer:** True

Options: A) True; B) False

Note: A budget deficit is defined as the financial situation that arises when a government's total expenditures exceed its total revenues within a specified fiscal period, indicating that the government is spending beyond its means.

7. **Answer:** False

Options: A) True; B) False

Note: Members of Congress are allowed to mail letters to constituents due to the franking privilege, which enables them to send mail without charge for official communications, rather than because of pork-barrel legislation, which refers to funding that benefits specific projects or constituents in order to gain political favor.

8. **Answer:** True

Options: A) True; B) False

Note: NSC 68 marked a pivotal change in U.S. Cold War strategy by advocating for a substantial military buildup and a policy of active containment against the Soviet Union, reflecting a shift from diplomatic engagement to a more confrontational approach.

9. **Answer:** True

Options: A) True; B) False

Note: Richard Nixon's visit to communist China in 1972 was a pivotal moment that initiated diplomatic relations between the two countries, making him the first sitting U.S. president to do so.

10. **Answer:** True

Options: A) True; B) False

Note: The statement is true because the International Monetary Fund (IMF) is indeed an international organization consisting of 190 member countries that works to promote global economic stability, facilitate international trade, and provide financial assistance to countries in need.

Long Form Response

11. **Answer:** Federal judges in the United States can be disciplined primarily through the process of impeachment, which is initiated by the House of Representatives. If a majority of the House votes to impeach, the judge is then tried in the Senate, where a two-thirds majority is required for conviction. If convicted, the judge is removed from office, which underscores the balance of powers between the branches of government.

This process serves as a critical check on judicial misconduct, ensuring accountability while also protecting judicial independence. The implications of this mechanism highlight the seriousness of judicial behavior and the potential consequences of overstepping ethical or legal boundaries in the judiciary. Overall, impeachment, conviction, and removal represent essential safeguards in maintaining the integrity of the federal judiciary.

Note: The answer accurately describes the impeachment process as the primary mechanism for disciplining federal judges, detailing the roles of the House of Representatives and the Senate, and emphasizing the importance of this process in maintaining the balance of powers and ensuring judicial accountability.

12. **Answer:** Critical Security Studies, as defined by Krause, emphasizes the importance of understanding security through a lens that incorporates social, political, and historical contexts. However, the assertion that natural-science methodology is superior to interpretive methodologies in studying social sciences raises significant debate. Proponents argue that natural-science methodologies provide a more rigorous and objective framework, allowing for coherent and systematic analyses that can uncover causal relationships. In contrast, interpretive methodologies are often criticized for their perceived lack of coherence, which can undermine their effectiveness in providing in-depth analysis. Ultimately, while natural-science approaches may offer valuable insights, the complexity of social phenomena often necessitates a more nuanced understanding that interpretive methodologies can provide.

Note: The answer correctly identifies that Critical Security Studies, as outlined by Krause, emphasizes contextual understanding of security, while also critically examining the debate surrounding the superiority of natural-science methodologies over interpretive approaches in social sciences.
