

Multiple Choice (10 marks)

1. Standardized tests are
 - (a) tests that are used to measure intelligence
 - (b) tests that are given only once a year
 - (c) tests that have no right or wrong answers
 - (d) tests for which a person's performance can be compared with a pilot group
 - (e) any examination given by your state or country
2. MRI is preferred over CT (computed tomography) in all of the following scenarios, EXCEPT:
 - (a) The detection of spinal cord injuries
 - (b) The detection of white matter abnormalities
 - (c) The detection of soft tissue injuries
 - (d) The detection of a small tumor
 - (e) The detection of lung cancer
3. In a skewed smooth distribution with a tail extended to the left, the statistic with the highest value is the
 - (a) median
 - (b) interquartile range
 - (c) geometric mean
 - (d) quartile deviation
 - (e) variance
4. In a two-variable situation in which one variable is dichotomous and the other is interval and continuous, which of the following correlation procedures is most appropriate
 - (a) Kendal's tau
 - (b) Biserial correlation
 - (c) Cramer's V
 - (d) Eta
 - (e) Goodman and Kruskal's gamma
5. During the manic phase of a bipolar disorder, individuals are most likely to experience
 - (a) extreme fatigue

- (b) high self-esteem
- (c) memory loss
- (d) intense fear and anxiety
- (e) uncontrollable grief and despair

True / False (10 marks)

Answer True or False

6. True or False: Episodic memory is responsible for recalling information acquired within the past few hours to days.
7. True or False: Anxiety disorders are primarily caused by environmental factors and have no significant genetic predisposition.
8. True or False: Both lists 1 and 3 contribute to proactive interference when trying to remember list 2.
9. True or False: Only trainees with high initial ability show improvement in performance following extensive training programs.
10. True or False: A learned response is a behavior that occurs automatically in reaction to a specific environmental stimulus.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss how the foundational belief in human nature as innately capable of self-fulfillment distinguishes client-centered therapy from classical therapeutic approaches.
12. Discuss the nature of case studies in qualitative research, particularly addressing the misconception that findings from case studies can be generalized. How does this relate to theory development?
