

Multiple Choice (10 marks)

1. Garcia and Koelling's research regarding learned aversions established that which of the following UCS and CS pairs are the most powerful and learned most quickly?
 - (a) pleasure and a visual stimulus
 - (b) thirst and a particular color
 - (c) movement and shock
 - (d) punishments and rewards
 - (e) anger and a specific musical note
2. What are the four basic factors in learning?
 - (a) perception, insight, retention, recall
 - (b) arousal, motivation, reinforcement, and association
 - (c) analysis, synthesis, evaluation, creation
 - (d) encoding, storage, retrieval, adaptation
 - (e) observation, imitation, practice, feedback
3. A psychologist focusing on whether development occurs in stages is most interested in which of the following controversies?
 - (a) rationality versus irrationality
 - (b) stability versus change
 - (c) cognition versus behavior
 - (d) qualitative versus quantitative data
 - (e) conscious versus unconscious influences
4. Dr. Marcos Manzetti uses a "sliding scale" that is based on a client's current income to set his fees for therapy. Dr. Manzetti's practice is:
 - (a) not mentioned in the ethical guidelines.
 - (b) ethically acceptable, as it provides opportunities for those with lower income.
 - (c) explicitly recommended in the ethical guidelines.
 - (d) ethically acceptable since it serves the best interests of his clients.
 - (e) explicitly recommended in the legal guidelines.
5. The term "insanity" is a:
 - (a) psychological term for an uncontrollable state of mind.

- (b) medical term for a severe mental illness.
- (c) popular (lay) term for a severe mental illness.
- (d) legal, non-psychiatric term for certain types of mental disorders.
- (e) legal, non-psychiatric term for a psychotic disorder with an unknown etiology.

True / False (10 marks)

Answer True or False

- 6. True or False: The ability to process information rapidly tends to decline significantly with age.
- 7. True or False: Infants babble using the full range of phonemes present in all languages, regardless of their community.
- 8. True or False: In test construction, validity refers to the degree to which a test measures what it purports to measure.
- 9. True or False: Donald Super's career ladder is a model that represents the sequence of life roles across different life stages.
- 10. True or False: People in the manic phase of bipolar disorder typically experience extreme fatigue and low energy levels.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Discuss the implications of statistical nonsignificance under low power in psychological research, and explain why this outcome may provide limited information about the studied phenomenon.
- 12. Discuss how Samuel S.'s feeling of impending job loss despite receiving a bonus exemplifies cognitive distortions, particularly arbitrary inference, according to Aaron Beck's theory.
