

Multiple Choice (10 marks)

1. The contingency model explains classical conditioning from which of the following perspectives?
 - (a) ecological
 - (b) developmental
 - (c) humanistic
 - (d) behavioral
 - (e) sociocultural
2. For this series of observations find the mean, median, and mode. 500, 600, 800, 800, 900, 900, 900, 900, 900, 1000, 1100
 - (a) Mean: 900, Median: 800, Mode: 1000
 - (b) Mean: 845.45, Median: 900, Mode: 900
 - (c) Mean: 845.45, Median: 900, Mode: 1000
 - (d) Mean: 845.45, Median: 800, Mode: 800
 - (e) Mean: 800, Median: 900, Mode: 800
3. Life span developmental theories, such as Baltes's Selective Optimization with Compensation theory,
 - (a) Focus solely on the influence of early childhood experiences
 - (b) Focus mainly on the development of psychopathology over time
 - (c) Suggest that development is a linear process without any decline
 - (d) All of the above
 - (e) Are mainly concerned with cognitive development
4. In classical psychoanalytic theory, a maladaptive behavior that emerges as a compromise between an unconscious impulse and the resulting defense process is called
 - (a) fixation
 - (b) projection
 - (c) symptom
 - (d) regression
 - (e) denial
5. List and define three approaches to the study of developmental psychology.

- (a) Biological, psychoanalytic, and social learning
- (b) Learning, constructivist, and information processing
- (c) Biological, evolutionary, and cognitive
- (d) Contextual, evolutionary, and psychodynamic
- (e) Sociocultural, learning, and ecological

True / False (10 marks)

Answer True or False

- 6. True or False: People remain in a state of high arousal after a crisis because their heart rate decreases significantly over time.
- 7. True or False: Lack of timely feedback is a frequent cause of ethical complaints against psychotherapy supervisors.
- 8. True or False: Contemporary intelligence researchers believe schools should prioritize physical education and sports over academic subjects.
- 9. True or False: The axon terminal of a neuron directs the synthesis of neurotransmitters and proteins.
- 10. True or False: In Gestalt therapy, transference is often understood as a fantasy created by the client projecting their feelings onto the therapist.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Discuss the impact of damage to the left temporal lobe on language comprehension, including underlying mechanisms and implications for cognitive function.
- 12. Discuss how confabulatory responses in Rorschach testing indicate an individual's difficulty in perceiving abstract concepts, providing examples to illustrate your analysis.
