

Multiple Choice (10 marks)

1. The notion that there are three major life tasks - friendship, occupation, and love - is MOST consistent with the philosophy of:
 - (a) Perls.
 - (b) Maslow.
 - (c) Erikson.
 - (d) Piaget.
 - (e) Rogers.
2. Nearsightedness results from
 - (a) too little curvature of the cornea and lens
 - (b) too much curvature of the retina and lens
 - (c) too much curvature of the cornea and lens
 - (d) too much curvature of the iris and cornea
 - (e) incorrect alignment of the cornea and retina
3. Quasi-experimental designs are distinguished from true experimental designs on the basis of whether there is
 - (a) implementation of the intervention by the researcher
 - (b) pre-determined assignment of participants to groups
 - (c) use of a non-comparison group
 - (d) use of multiple measures of outcome
 - (e) use of a single group of participants
4. Identify the only construct that is not pertinent to developmental models on intelligence:
 - (a) Triarchic theory of intelligence
 - (b) Multiple intelligences theory
 - (c) Cognitive development theory
 - (d) The positive manifold
 - (e) G theory
5. Neural transmission is often described as an electrochemical process. Which of the following is most directly involved in the electrical aspect?

- (a) cell body
- (b) myelin
- (c) synaptic vesicles
- (d) glial cells
- (e) terminal buttons

True / False (10 marks)

Answer True or False

6. True or False: The neurotic does not discard symptoms that fail to relieve anxiety, often holding onto them in hopes of finding relief.
7. True or False: A lesion in the occipital lobe typically affects facial recognition abilities.
8. True or False: Lack of exercise is a critical factor in Type A behavior that is associated with an increased risk of heart disease.
9. True or False: According to Erikson, a young adult's developmental crisis centers around autonomy vs. shame and guilt.
10. True or False: Cognitive dissonance is primarily associated with the resolution of external conflicts and social pressures.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the behavioral alternatives available to an organism in a conflict situation, as proposed by Neal Miller, and analyze how goal proximity and drive strength influence these behaviors.
12. Discuss the projective hypothesis in psychology, focusing on how social functioning may reflect underlying psychological processes. Analyze the implications of this relationship.
