

Multiple Choice (10 marks)

1. Verbal stimuli may be an acquired source of drive. Discuss.
 - (a) Verbal cues are effective as motivational sources only in specific cultural contexts.
 - (b) Only non-verbal stimuli can serve as sources of drive.
 - (c) Verbal stimuli serve as a source of drive exclusively in early childhood development.
 - (d) Verbal stimuli are an innate source of drive, not acquired.
 - (e) Verbal stimuli are not an acquired source of drive.
2. In Pavlov's conditioning of dogs, the point at which the dogs salivated at the sound of the tone without the food being present is referred to as
 - (a) reinforcement
 - (b) an unconditioned stimulus
 - (c) conditioned response
 - (d) operant conditioning
 - (e) generalization
3. The belief that a child's misbehavior has one of four goals - i.e., attention, revenge, power, or to display inadequacy - is most consistent with:
 - (a) Skinner's behaviorism
 - (b) Adler's individual psychology.
 - (c) Beck's cognitive-behavioral therapy.
 - (d) Perls's Gestalt therapy.
 - (e) Erikson's stages of psychosocial development
4. Discuss the effects of sleep deprivation.
 - (a) Decreased blood pressure, heightened sensory perception, faster reaction times
 - (b) Strengthened cognitive abilities, longer lifespan, better pain tolerance
 - (c) Enhanced problem-solving skills, increased emotional stability, improved coordination
 - (d) Sharper focus, accelerated learning ability, increased creativity
 - (e) Improved cardiovascular health, reduced inflammation, increased energy levels
5. What function does time have in classical and operant conditioning ?

- (a) Intensity of the unconditioned stimulus
- (b) Conditioned stimuli
- (c) Temporal contiguity
- (d) Sequence of stimuli
- (e) Spatial contiguity

True / False (10 marks)

Answer True or False

- 6. True or False: A group's performance on a conjunctive task is determined by the performance of its least skilled member.
- 7. True or False: The focus of structuralists most closely aligns with the behaviorist perspective in psychology.
- 8. True or False: Greater change of belief in forced compliance situations occurs when compliance is accompanied by a small reward.
- 9. True or False: The correction for attenuation formula primarily evaluates how a test's difficulty impacts its reliability.
- 10. True or False: Men and women react aggressively to crowded conditions to about the same degree.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Discuss how Rosenhan's research with "pseudopatients" illustrates the impact of environment on the perception of behavior in psychiatric contexts.
- 12. Discuss the ethical considerations Dr. Leonard Lykowski should evaluate when feeling hostility towards a therapy client due to personal associations. What steps should he take?
