

Multiple Choice

1. **Answer:** C

Options: A) it focuses on the researchers' own experiences; B) it makes little distinction between the way the world is and the way it ought to be; C) its knowledge is accumulated from many different research contexts; D) it is subjective and biased

Note: Sociology is based on systematic research and empirical evidence gathered from diverse contexts, which allows it to develop comprehensive theories and understandings, whereas common sense relies on anecdotal experiences and unverified assumptions.

2. **Answer:** A

Options: A) triangulation; B) explanation; C) description; D) exploration

Note: Triangulation is a methodological approach used to enhance the validity of research findings by combining multiple data sources or methods, rather than being a distinct research purpose itself.

3. **Answer:** A

Options: A) a religious organization that claims total spiritual authority over its members; B) a church organized around voluntary rather than compulsory membership; C) a sect or cult with a very small following; D) a hierarchy of priests or other spiritual leaders

Note: The correct answer is appropriate because an ecclesia is defined as a religious organization that is integrated into the political structure of society and holds total spiritual authority over its members, often encompassing the entire population within its religious framework.

4. **Answer:** C

Options: A) effervescent ceremonies that create a feeling of belonging; B) images of gods or totems that are widely recognized; C) shared ideas and moral values, often symbolized by an object or figurehead; D) ideological tools used to obscure class divisions

Note: The correct answer is supported by Durkheim's emphasis on collective representations as the shared beliefs and values that provide social cohesion and identity within a society, often embodied in symbols or figures that unite individuals under common moral frameworks.

5. **Answer:** A

Options: A) declining profits and rising unemployment; B) the eradication of the welfare state; C) rising divorce rates and the decline of the traditional family; D) an unfortunate twist in fashion sensibility

Note: The term 'crisis of the 1970 s' accurately describes the economic turmoil characterized by declining profits and rising unemployment, reflecting the broader socio-

economic challenges such as stagflation that significantly impacted societies during this period.

True / False

6. **Answer:** False

Options: A) True; B) False

Note: The experimental method is based on objective observation and empirical evidence rather than personal beliefs and values, ensuring that research studies are conducted systematically and impartially.

7. **Answer:** True

Options: A) True; B) False

Note: Both the Church of Norway and Islam promote the belief in a single, all-powerful deity, which fundamentally defines them as monotheistic religions.

8. **Answer:** True

Options: A) True; B) False

Note: Patterson's study of Brixton highlighted the socio-economic tensions between black and white residents, illustrating that both groups were vying for limited resources and housing opportunities in a competitive urban environment.

9. **Answer:** False

Options: A) True; B) False

Note: In stage 3 of the health transition, chronic diseases and lifestyle-related conditions, such as heart disease and diabetes, become the dominant causes of illness and death, rather than acute, infectious diseases.

10. **Answer:** False

Options: A) True; B) False

Note: A moral panic typically arises when the media portrays certain groups or behaviors as a threat to societal values, leading to heightened public concern and not from audiences challenging the stereotypes.

Long Form Response

11. **Answer:** A population pyramid that is wider at the bottom than at the top typically indicates a society with high birth rates and lower death rates, suggesting a youthful population structure. This demographic pattern often results from improved health-care, sanitation, and nutrition, leading to decreased infant mortality and longer life expectancy. Over several generations, such a pyramid can lead to rapid population growth, increased dependency ratios, and potential challenges in resource allocation and employment opportunities. As the population ages, the society may face pressures related to education, healthcare, and social services to accommodate the burgeoning youth demographic. Ultimately, this demographic scenario reflects broader

socio-economic dynamics, influencing policy-making and planning in various sectors.

Note: correct because a population pyramid wider at the bottom indicates high birth rates and lower death rates, which, combined with improved living conditions, leads to population growth and socio-economic challenges over time.

12. **Answer:** Margaret Thatcher's government implemented socio-economic policies that prioritized market liberalization and individual responsibility, significantly impacting welfare provisions for single parents, students, and the unemployed. While the government initially aimed to reduce state spending, it paradoxically maintained generous financial benefits for these groups, albeit often under stringent conditions. For single parents, policies included the introduction of the Child Benefit, which provided essential financial support, yet simultaneously reinforced traditional family structures. Students faced a mixed bag of increased tuition fees alongside student loans that shifted the financial burden onto individuals, promoting a culture of self-reliance. Unemployment benefits, while available, were often tied to stringent job-seeking requirements, reflecting a broader ideological shift towards personal accountability. Overall, Thatcher's approach redefined welfare, balancing the provision of support with an emphasis on individualism and economic independence.

Note: correct because it accurately reflects Thatcher's prioritization of market liberalization and individual responsibility, while acknowledging the complexities of welfare policies that, despite a reduction in overall state spending, still provided financial support to vulnerable groups like single parents, students, and the unemployed under strict conditions.
