

Multiple Choice

1. **Answer:** C

Options: A) Ethnocentrism; B) Stereotyping; C) Scapegoating; D) Institutionalization

Note: Scapegoating is a sociological term that refers to the practice of unfairly blaming a specific group for broader societal issues, often diverting attention from the true causes of those problems.

2. **Answer:** B

Options: A) Wider at the top than in the middle; B) Wider at the bottom than at the top; C) Bulging in the middle; D) Having parallel sides

Note: A population pyramid that is wider at the bottom than at the top indicates a growing population with a higher birth rate than death rate, reflecting a larger proportion of younger individuals compared to older generations.

3. **Answer:** D

Options: A) A preschool provider; B) A peer group; C) The mass media; D) The family

Note: The family is the most important agent of socialization in early childhood because it is the primary context in which children first learn values, norms, and behaviors essential for their social development.

4. **Answer:** C

Options: A) the rates of violent crime were similar for men and women; B) women's sexual delinquency was more likely to be normalized than men's; C) women's criminal behaviour tended to reflect traditional gender roles; D) all of the above

Note: Smart's work highlighted that women's criminal behavior often aligns with socially constructed gender roles, suggesting that their offenses are frequently influenced by societal expectations and norms related to femininity.

5. **Answer:** A

Options: A) there is a large 'dark figure' of unreported incidents; B) the changing definitions of legal categories have made it harder to convict offenders; C) researchers are not allowed access to official statistics; D) there is no valid or reliable way of researching such a sensitive topic

Note: The correct answer highlights the significant number of unreported incidents of domestic violence, known as the 'dark figure,' which obscures the true prevalence of this issue and complicates efforts to fully understand its extent within society.

True / False

6. **Answer:** True

Options: A) True; B) False

Note: Soap operas are considered a 'feminine genre' because they often explore complex narratives that reflect women's roles in society, portraying them as both caretakers within domestic spaces and as individuals pursuing personal agency and independence.

7. **Answer:** False

Options: A) True; B) False

Note: A moral panic occurs when a group of people collectively perceive a threat to societal norms or values, often fueled by media portrayals, rather than actively challenging and rejecting those stereotypes.

8. **Answer:** False

Options: A) True; B) False

Note: The statement is false because the capitalist world economy operates on a global scale, facilitating the exchange of goods, services, and capital across international borders rather than merely transporting money within a single country.

9. **Answer:** True

Options: A) True; B) False

Note: Sociology draws from a wide range of research contexts, including qualitative and quantitative methods, to integrate various perspectives and findings, thereby creating a richer and more nuanced understanding of the complexities of social phenomena.

10. **Answer:** True

Options: A) True; B) False

Note: Social norms are indeed established guidelines that dictate acceptable behavior and interactions among individuals in a society, thereby regulating social conduct and fostering coherence within social groups.

Long Form Response

11. **Answer:** Blauner's (1964) perspective on alienation in the workplace highlights the detrimental effects of mechanized labor, particularly in car manufacturing assembly plants. He argues that the repetitive and monotonous tasks involved in assembly line work strip employees of their creativity and autonomy, leading to a profound sense of disconnection from their labor and the products they create. This alienation not only diminishes job satisfaction but also adversely affects overall employee well-being, as workers may experience feelings of powerlessness and disengagement. Consequently, the structured and impersonal nature of assembly plant work can result in higher rates of stress and job dissatisfaction, illustrating the need for reforms that promote a more fulfilling work environment.

Note: correct because it accurately reflects Blauner's argument that mechanized labor

in assembly plants leads to alienation through repetitive tasks, resulting in a loss of creativity and autonomy that negatively impacts employee satisfaction and well-being.

12. **Answer:** Informal negative sanctions, such as teasing, can significantly impact children's social development by influencing their self-esteem and coping mechanisms. For instance, behaviors like thumb-sucking may be perceived as socially unacceptable in a kindergarten setting, leading to teasing from peers. This teasing serves as an informal negative sanction that can exacerbate feelings of insecurity and withdrawal in children, potentially hindering their ability to form social connections and navigate peer relationships. As children internalize these negative reactions, they may resort to maladaptive behaviors or further engage in thumb-sucking as a coping strategy, highlighting the profound role that informal social consequences play in shaping developmental outcomes. Ultimately, the implications of such sanctions underscore the importance of fostering supportive environments that mitigate negative peer interactions.

Note: correct because it illustrates how informal negative sanctions, such as teasing, can undermine a child's self-esteem and social skills by targeting behaviors deemed unacceptable, like thumb-sucking, which can lead to social withdrawal and hinder their development of peer relationships.
