

Multiple Choice

1. **Answer:** C

Options: A) effervescent ceremonies that create a feeling of belonging; B) images of gods or totems that are widely recognized; C) shared ideas and moral values, often symbolized by an object or figurehead; D) ideological tools used to obscure class divisions

Note: The correct answer is accurate because Durkheim defined collective representations as the shared beliefs, values, and symbols that unify a society, reflecting its moral consensus and cultural identity.

2. **Answer:** D

Options: A) the subdivision of labour into small tasks; B) the measurement and specification of work tasks; C) motivation and rewards for productivity; D) all of the above

Note: The correct answer is "all of the above" because scientific management encompasses various principles aimed at improving productivity and efficiency through systematic study and optimization of work processes, which includes time studies, standardization, and the separation of planning from execution.

3. **Answer:** D

Options: A) rates of income tax increased equally for all occupational groups; B) there were more professional jobs available but not enough people to fill them; C) the price of consumer goods rose at a higher rate than earnings; D) growing unemployment made more people dependent on welfare benefits

Note: The correct answer highlights that the rise in unemployment during the 1980 s led to increased reliance on welfare benefits, illustrating how economic hardship can exacerbate income inequality by limiting opportunities for lower-income individuals to improve their financial situations.

4. **Answer:** C

Options: A) the mass production of standardized products for passive audiences; B) television based on producer-broadcaster rather than publisher-broadcaster models; C) a diverse range of products aimed at niche markets; D) increasing numbers of advertisements for motoring and car-related products

Note: The correct answer reflects the key concept of Post-Fordism, which emphasizes flexibility and specialization in production processes, resulting in a diverse array of media products tailored to specific niche markets rather than mass production for a general audience.

5. **Answer:** B

Options: A) race is an objective way of categorizing people on biological grounds; B) the idea of race is socially constructed through powerful ideologies; C) race relations in Britain and America can be traced back to colonial times; D) people choose their

racial identity and this becomes fixed

Note: The correct answer highlights that theories of racialized discourse emphasize that race is not a biological fact but rather a concept shaped by societal beliefs and ideologies that influence perceptions and treatment of individuals based on their perceived racial identity.

True / False

6. **Answer:** False

Options: A) True; B) False

Note: The social democratic model emphasizes social justice, equality, and individual rights rather than loyalty to the state and traditional values.

7. **Answer:** False

Options: A) True; B) False

Note: Differential association theory asserts that criminal behavior is learned through interactions with others in a social context, emphasizing the role of social environment rather than inherent predisposition.

8. **Answer:** True

Options: A) True; B) False

Note: The statement is true because social class is a complex construct influenced by various factors such as income, education, occupation, and cultural capital, which can differ significantly across studies, leading to inconsistencies in definitions and measurement.

9. **Answer:** True

Options: A) True; B) False

Note: Goldthorpe identified the 'service class' as a distinct social group comprising individuals in non-manual occupations who hold positions of authority and responsibility, particularly in relation to state functions and services.

10. **Answer:** False

Options: A) True; B) False

Note: The concept of 'culture industry,' as proposed by Theodor Adorno and Max Horkheimer, critiques how mass-produced culture homogenizes and commodifies cultural experiences, thereby limiting the emergence of genuine subcultures and counter-cultures.

Long Form Response

11. **Answer:** The construction of a new highway extending from a major city through farmland is likely to accelerate suburbanization, as it significantly reduces commute times to urban centers. This increased accessibility can encourage urban dwellers to relocate to the suburbs, seeking more affordable housing and a perceived higher

quality of life. As populations shift, local communities may experience changes in demographics, with an influx of new residents potentially leading to cultural integration and economic growth, but also social tensions and the displacement of existing rural populations. Additionally, the conversion of farmland into residential and commercial developments can alter local economies and disrupt traditional agricultural practices. Overall, while suburbanization can bring economic opportunities, it also poses challenges that local communities must navigate.

Note: correct because it identifies how a new highway enhances accessibility, facilitating suburbanization, which alters local demographics and potentially fosters cultural integration within communities.

12. **Answer:** The sexual revolution of the 1960 s marked a significant shift in societal norms regarding sexuality, characterized by increased openness about sexual expression, the rise of the feminist movement, and the availability of contraceptives. This period fostered a more liberated attitude towards sex, challenging traditional values and promoting individual freedom. However, this liberation also laid the groundwork for emerging fears surrounding sexually transmitted infections, particularly HIV and AIDS in the 1980 s. The New Right capitalized on these fears, framing the epidemic as a moral crisis linked to sexual promiscuity and deviant behaviors, which intensified societal stigmas. As a result, the response to HIV and AIDS became intertwined with moral judgments, shaping public discourse and policy in ways that reflected broader anxieties about sexuality and societal change.

Note: correct because it effectively identifies the key components of the sexual revolution, such as increased sexual openness, feminist activism, and contraceptive access, while also linking these changes to the subsequent societal anxieties regarding HIV and AIDS, illustrating a direct relationship between sexual liberation and public health concerns.
