

Multiple Choice

1. **Answer:** D

Options: A) the introduction of compulsory education; B) increasingly emotional ties between parents and children; C) new consumer goods for children, such as clothes, toys and books; D) all of the above

Note: The correct answer is "all of the above" because the social construction of childhood encompasses various historical, cultural, and social factors that collectively shape our understanding of what childhood means in different societies.

2. **Answer:** D

Options: A) the expansion of private security companies; B) the building of private prisons; C) the introduction of market disciplines to measure police performance; D) all of the above

Note: The correct answer is "all of the above" because the privatization of law and order in the 1980 s and 1990 s involved various factors, including the outsourcing of police services, the rise of private security firms, and the implementation of community policing strategies, all of which collectively contributed to a shift towards privatized approaches in maintaining law and order.

3. **Answer:** C

Options: A) a fairground ride; B) a circus; C) a puppet theatre; D) a ballet

Note: Berger (1963) uses the metaphor of a puppet theatre to illustrate how individuals are shaped and manipulated by social structures and cultural norms, emphasizing the performative aspects of social interactions and the roles people play within society.

4. **Answer:** A

Options: A) socialization into working class families and communities; B) rational calculation of self-interest; C) issue-based concerns about culture and lifestyle; D) false consciousness and the acceptance of hegemonic values

Note: The correct answer is based on the concept of political socialization, which posits that individuals are influenced by the values, beliefs, and norms of their family and community, leading working-class individuals to align with the Labour Party, historically associated with their socio-economic interests.

5. **Answer:** C

Options: A) did not exist in any form; B) had begun to disappear, as extended networks of kin became more important; C) had begun to emerge through the separation of work and home life; D) was simply another institution of patriarchal control

Note: Stone's research indicates that the emergence of the nuclear family was influenced by the separation of work and home life, which began to take shape before the industrialization period, fundamentally altering familial structures.

True / False

6. **Answer:** False

Options: A) True; B) False

Note: Warner and Myrdal argued that black former slaves faced significant barriers to assimilation due to systemic racism and social structures that perpetuated inequality, rather than a genuine eagerness to integrate into the white population.

7. **Answer:** False

Options: A) True; B) False

Note: The New Labour government focused on centralizing education reforms and promoting market-driven approaches, often bypassing failing local education authorities rather than actively supporting them.

8. **Answer:** False

Options: A) True; B) False

Note: Equilibrium theories of social change primarily emphasize the stability and balance of social systems rather than the dynamic influences of globalization and cultural exchange.

9. **Answer:** True

Options: A) True; B) False

Note: 'Eyeballing' refers to the practice of visually assessing data in tables to quickly discern trends and noteworthy values, which is a common preliminary step in sociological data analysis.

10. **Answer:** True

Options: A) True; B) False

Note: National cultures can resist American media dominance by employing strategies such as domesticating content to reflect local values, banning imports to limit foreign influence, and creating reverse flows of programming that promote indigenous narratives and perspectives.

Long Form Response

11. **Answer:** Current research findings indicate that, despite both partners in a couple being employed, most men married to working women do not share the responsibilities of housework and childcare equally. This persistent imbalance in domestic labor reflects deeply entrenched gender roles and societal expectations that continue to influence behavior within households. Studies show that women still undertake a disproportionate amount of these tasks, which can lead to increased stress and reduced career advancement opportunities for them. The implications of these findings suggest that achieving true gender equality in the workplace requires not only policy changes but also a cultural shift in how domestic responsibilities are perceived and divided among couples. Addressing these disparities is crucial for fostering a more equitable environment both at home and in professional settings.

Note: correct because it illustrates the ongoing disparity in the division of domestic labor between genders, emphasizing how traditional gender roles and societal expectations persist even in dual-income households, leading to negative impacts on women's well-being and career progression.

12. **Answer:** Auguste Comte is often regarded as the father of sociology, as he played a crucial role in establishing it as a distinct field of study in the early 1800 s. His formulation of positivism emphasized the application of scientific methods to the study of society, advocating that social phenomena could be analyzed objectively, similar to the natural sciences. Comte's ideas encouraged the systematic examination of social structures and relationships, laying the groundwork for empirical social research. This shift towards a scientific approach not only legitimized sociology as an academic discipline but also influenced future scholars to adopt rigorous methodologies in their investigations of social behavior and institutions. Ultimately, Comte's contributions fostered a deeper understanding of societal dynamics and promoted the idea that human behavior could be studied and understood through systematic inquiry.

Note: correct because it accurately identifies Auguste Comte as the foundational figure in sociology, highlighting his introduction of positivism and the scientific approach to social phenomena, which significantly influenced the development of empirical social research methods.
